

Exchange Components Short Description

Travel Drives for Mining Excavators

Applicable for Hitachi*

Spend less, dig more.
Components beyond Liebherr

In mining, heavy-duty machinery is the basis of your business success. To get the job done, you need components for your equipment that you can rely on. This is exactly what you find at Liebherr.

Designed and manufactured in Germany – Mining aftermarket drives for excavators are robust – even with continuous operation under toughest conditions.

Our portfolio for exchange components also contains slewing bearings and hydraulic cylinders. Scan the QR code on this paper to find more information about us or place your inquiry.

” Our customers were looking for travel drives with Liebherr-quality. What we engineered is a highly durable product at Liebherr-standard. Based on production know-how and field-experience.”

Roman Maurer, design engineer at Liebherr
