Edition 2024

LIEBHERR

Concrete Technolgy

Opening words

Dear Ladies and Gentlemen,

Trainings provide an interactive learning environment to learn from experts in their field, share with peers and deepen your understanding.

Once again, we are pleased to present the training programme for the 2024 training season. We offer a wide range of service training for mixing plants, truck mixers and concrete pumps.

Each of our trainings includes theoretical basics to practical applications, from discussions to lively interactions - be ready to dive into the world of knowledge and unleash your potential.

In general, all our service seminars include the topics of safe operation, maintenance, care and diagnosis. You can read about the exact seminar contents on the following pages.

Furthermore, good service means "customer proximity". Only those who know their customers' needs can respond to them and offer them added value. As Albert Einstein already recognized, progress lives from the exchange of knowledge. Register your employees for our seminars and improve the quality of Liebherr Concrete technologies service. Your employees should be qualified in the handling of our machines and plants so that our customers can use our products profitably.

Please feel free to pass on our seminar program. Your colleagues will certainly also be interested in the Liebherr Concrete technology seminar program.

We look forward to welcoming you soon at our seminar centers in Bad Schussenried or Neu-Ulm.

With kind regards

Your training team

General training conditions

Registration for trainings

You can register for our trainings using the registration forms included in the training program. All we need for your registration is your company address and the name of each participant. Please tick the boxes for the training you would like to attend and return the completed form to us by e-mail.

Participation requirements

In order to ensure that the training generates added value for you and your daily work, we ask you to consider the target groups when choosing your trainings.

Training fee

The fees can be found in the descriptions of the trainings. If a participant only attends the training temporarily, this does not entitle him/her to a price reduction.

Services

The content of the training is conveyed in accordance with the training description. Lunch is provided free of charge. Training documentation and a personal certificate of attendance will be distributed. Costs such as travel, and accommodation expenses are paid by the participant.

Change of training

We hereby reserve the right to cancel a training if a trainer is unable to perform due to illness or force majeure, or if the number of participants is too low to allow the training to be held in an economically viable manner.

Arrival and hotel reservation

We kindly ask you to organize the travel to our Liebherr training center as well as the hotel reservation yourself (see hotel list and travel plan). We will be happy to help you with any problems that may arise. The parking space in front of the office building is allocated to the training participants.

Training times

The training times are indicated in the course description.

We reserve the right to cancel our trainings in exceptional situations, such as pandemics, etc., due to the general welfare.

We and the Human Resources Development Department will be happy to help you find the "right" course for you.

Your training team

What advantages do you gain from participating in our seminars?

Development of professional action competence

Elaboration of an individual training

Improving social skills

We want to build up and expand your knowledge of our product and service areas through our target group-oriented trainings. Especially in the product area of mixing plants, we rely on modular training that build on each other. In the basic trainings, we first want to create a product-related basic knowledge. In this way, we build a foundation on which to later build. After successful completion of the basic training, there is an advanced training that builds on this. Here, the previously acquired specialist knowledge is deepened once again. A distinction is made between the two target groups of truck mixer drivers and garage personnel. This differentiation ensures that the trainings have a high practical relevance. This distinction also contributes to the greatest possible learning success.

A further advantage results from the improvement of communication with your responsible service partner. By using Liebherr-specific wording, misunderstandings can be avoided.

What benefits do we pursue with our seminars?

Preparation for daily challenges

Expansion of expert knowledge

Ensuring professional Competence

Our trainings primarily offer you the benefit of consolidating and expanding your professional competence. We achieve this through a balanced mix of theoretical knowledge and practical application. In this way, we ensure that the trainings are highly relevant to practice and prepare you optimally for the challenges of everyday life.

Advancing digitalisation not only places new demands on your company, but also on your employees. Especially the constantly changing technology makes continuous training almost indispensable. Therefore, it is important to us as a company to train and qualify you comprehensively in the handling of our products and the technology they contain. Our trainings offer you the opportunity to continuously develop yourself in connection with our products and to stay up to date.

Training center

We are pleased to welcome you to our newly designed training center in Bad Schussenried.

Besides new furniture, we were also able to move in a smartboard. Using the Smartboard, even difficult contexts can be clearly conveyed.

Furthermore, we achieve more interactivity and dialogue because the participants are actively involved during the trainings.

Customer Training - Overview

Trainings title	Additional Informations	Duration	Date
Operator seminar Truck mounted concrete pump	Operating personnel ATTENTION Training location in Neu-Ulm	2 days	on request
Truck mixer HTM	Truck mixer drive and workshop personnel	1 day	on request
Conveyor belt LTB	Truck mixer drive and workshop personnel	1 day	on request
High voltage training 1 (HV1)	Service technican	0,5 day	on request
ETM1 Operator training	Service technican	0,5 day	on request
Basic training Batching plant	Maintenance personnel	2 days	on request
Advanced training Batching plant – Betomat	Maintenance personnel	2 days	on request
Advanced training Batching plant – Betomix/ Mobilmix/Compactmix	Maintenance personnel	2 days	on request
Training Dosing control Litronic MPS3	Maintenance personnel	3 days	on request
MyLiebherr Workshop	User of the MyLiebherr portal	0,5 day	on request

Based on our experience, we have set a minimum and a maximum number of participants for all trainings. If the maximum number of participants is exceeded, we willbtry to offer you an alternative date.

If we do not reach the minimum number of participants according to the training description, we reserve the right to cancel the respective training.

1 Concrete pump

Concrete pump

1.1 Operator training truck mounted concrete pump

Trainings content – & objectives

Do you want to learn about the safe operation, as well as the regular maintenance and care of a truck-mounted concrete pump? Then this is the right place for you.

- Operation of the machine (setting up, stability, emergency operating modes, additional equipment).
- Safety in handling the machine (VDMA, DGUV industry regulations)
- Site set-up (rights and obligations), connection of accessories/RV/FL
- Maintenance/ wear/ simple troubleshooting on the machine
- Safety instructions according to the operating instructions

 Target group Maschinenisten Autobetonpumpe	Duration 2 days 09:00 am – 4:00 pm
--	---

 Participant price 480 € plus VAT, incl. catering during the training	Nuber of praticipants 5 to 8
---	--

Training location Liebherr-Mischtechnik GmbH Niederlassung Neu-Ulm Lessingstraße 4 D-89231 Neu-Ulm Training Centre

Note As part of the training will take place outdoors, it is necessary for participants to bring appropriate weatherproof clothing in addition to their personal protective equipment (safety shoes, etc.).

2 Truck mixer and Conveyer belt

Truck mixer and Conveyer belt

2.1 Truck mixer HTM

Trainings content – & objectives

Are you interested in the structure and function of a truck mixer, safety and dangers, as well as control, maintenance and malfunction? Then this is the right seminar for you!

- Technical data and details
- Hydraulics / drive (pressure measurement / repair / troubleshooting)
- Function / application of additional equipment
- Liebherr Fahrmsicher control system (operation / replacement)
- Components: Frame, mixing drum, concrete transfer parts, drum drive, water system.
- Wear parts, wear minimisation, settings
- Maintenance / malfunction / UVV / occupational safety
- Safety instructions according to the operating instructions

Target group

Truck mixer drive and workshop personnel

Duration

1 day
09:00 am – 4:00 pm

Participant price

240 € plus VAT,
incl. catering during the training

Nuber of participants

4 to 8

Note

As part of the training will take place outdoors, it is necessary for participants to bring appropriate weatherproof clothing in addition to their personal protective equipment (safety shoes, etc.).

Training location

Liebherr-Mixing Technologie GmbH
Im Elchgund 12
D – 88427 Bad Schussenried
Training Centre

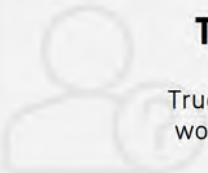

Truck mixer and Conveyer belt

2.2 Conveyer belt LTB

Trainings content - & objectives

Do you intend to further deepen your expertise in the area of product-specific technical data as well as maintenance and troubleshooting?

- General information on the use of conveyer belts
- Control and radio system, operation and simple error codes and troubleshooting
- Repair and maintenance, maintenance work, adjustments
- Hydraulics (functions of LS system, boom, support and valve block, troubleshooting)
- Structure of the components and special features
- Safety instructions according to the operating instructions

 Target group Truck mixer drive and workshop personnel	Duration 1 day 09:00 am – 4:00 pm
--	--

 Participant price 240 € plus VAT, incl. catering during the training	Number of participants 4 to 8
--	---

Note

As part of the training will take place outdoors, it is necessary for participants to bring appropriate weatherproof clothing in addition to their personal protective equipment (safety shoes, etc.).

Training location

Liebherr-Mixing Technologie GmbH
Im Elchgund 12
D – 88427 Bad Schussenried
Training Centre

Truck mixer and Conveyer belt

2.3 High voltage training 1 (HV1)

Trainings content - & objectives

In this training course, we focus on providing a sound knowledge of high-voltage systems, their mode of operation, the associated hazards as well as the necessary measures for accident prevention.

- General safety rules
- Design and function of HV systems
- Safe working on high-voltage vehicles
- Protective devices
- Information and training
- Responsibility regulation with HV system
- Safety instructions according to the operating instructions

 Target group Truck mixer drive and workshop personnel (no direct work on the HV system)	Duration 0,5 day 09:00 am-12:00 am
---	---

 Participant price 120 € plus VAT, incl. catering during the training	Number of participants 4 to 8
--	---

Note

Please take your personal protective and work clothing with you.

Training location

LiebherrMixing Technologie GmbH
Im Elchgrund 12
D – 88427 Bad Schussenried
Training Centre

Truck mixer and Conveyer belt

2.4 ETM 1 Operator Training

Trainings content - & objectives

In this training, you will learn important facts about the ETM truck mixer: safety, control, maintenance and troubleshooting. You will acquire practical know-how about electric drives and battery systems in truck mixers.

- Functional principle, design, operation
- Structure and operation of ETM on the vehicle
- Troubleshooting
- Maintenance work
- Safety instructions according to the operating instructions

Target group

Truck mixer drive and workshop personnel
(no direct work on the HV system)

Duration

0,5 day
1:00 pm - 4:00 pm

Participant price

120 € plus VAT,
incl. catering during the training

Number of participants

4 to 8

Note

Please take your personal protective and work clothing with you.

Training location

LiebherrMixing Technologie GmbH
Im Elchgrund 12
D – 88427 Bad Schussenried
Training Centre

3 Batching plants and Control system

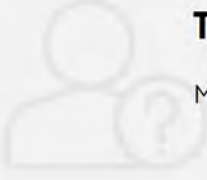

Batching plants and Control system

3.1 Basic Training Batching plants

Trainings content – & objectives

Our training imparts basic knowledge: Concrete technology, mixing systems and maintenance. Double benefit: Refresher and insights!

- Concrete technology / Mixing systems
- Components of a mixing plant
- What kind of recycling plant?
- Safety instructions according to the operating instructions
- Maintenance schedule and basic maintenance
- FAQ

 Target group Maintenance staff	Duration 2 days 09:00 am - -4:00 pm
---	--

 Participant price 480 € plus VAT, incl. catering during the training	Number of participants 4 to 12
--	--

Note

As part of the training will take place outdoors, it is necessary for participants to bring appropriate weatherproof clothing in addition to their personal protective equipment (safety shoes, etc.).

Training location

LiebherrMixing Technologie GmbH
Im Elchgrund 12
D – 88427 Bad Schussenried
Training Centre

Batching plants and Control system

3.2 Advanced Training Batching plant - BETOMAT

Trainings content – & objectives

Our training deepens your mixing plant knowledge in concrete technology, mixing systems and maintenance to solve technical problems and increase safety.

- Concrete technology / mixer systems
- Plant types (individual if necessary)
- How does a recycling plant work?
- Safety instructions according to the operating instructions
- Maintenance (in-depth)
- FAQ
- Practical area (mechanics, electrics, control, maintenance)

 Target group Maintenance staff Prerequisite (Basic Training Batching plant)	Duration 2 days 09:00 am - 4:00 pm
--	---

 Participant price 480 € plus VAT, incl. catering during the training	Number of participants 4 to 12
---	--

Note

As part of the training will take place outdoors, it is necessary for participants to bring appropriate weatherproof clothing in addition to their personal protective equipment (safety shoes, etc.).

Training location

LiebherrMixing Technologie GmbH
Im Elchgrund 12
D – 88427 Bad Schussenried
Training Centre

Batching plants and Control system

3.3 Advanced Training Batching plant – Betomix, Mobilmix, Compactmix

Trainings content – & objectives

Your benefit as a participant: Solution of technical challenges and safety during service work.

- Concrete technology / mixer systems
- Plant types (individual if necessary)
- How does a recycling plant work?
- Safety instructions according to the operating instructions
- Maintenance (in-depth)
- FAQ
- Practical area (mechanics, electrics, control, maintenance)

 Target group Maintenance staff Prerequisite (Basic Training Batching plant)	Duration 2 days 09:00 am -4:00 pm
---	--

 Participant price 480 € plus VAT, incl. catering during the training	Number of participants 4 to 12
---	--

Note

As part of the training will take place outdoors, it is necessary for participants to bring appropriate weatherproof clothing in addition to their personal protective equipment (safety shoes, etc.).

Training location

LiebherrMixing Technologie GmbH
Im Elchgrund 12
D – 88427 Bad Schussenried
Training Centre

Batching plants and Control system

3.4 Training Dosing control Litronic MPS 3

Trainings content – & objectives

In this training, you will acquire basic knowledge of the user interface and functionality of the Liebherr mixing plant control system so that you can use it effectively.

- Concrete technology / Mixer systems
- General operation of the MPS Litronic 3
- Calibration of the scales
- Printer installation
- Teleservice / remote maintenance
- Datensicherung und Wiederherstellung
- Schnittstellen Analyse
- Datenbankbereinigung
- Feuchtemessung FMS2
- 2. Arbeitsplatz Bedienung

 Target group Maintrance staff	Duration 3 days 09:00 am - 4:00 pm
--	---

 Participant price 720 € plus VAT, incl. catering during the training	Number of participants 4 to 8
---	---

Training location

LiebherrMixing Technologie GmbH
Im Elchgrund 12
D – 88427 Bad Schussenried
Training Centre

4. MyLiebherr Workshop

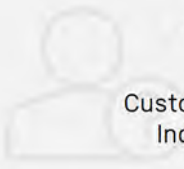

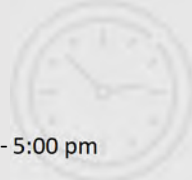

4.1 MyLiebherr Workshop

Trainingsinhalte – & Ziele

In this seminar you will learn to use MyLiebherr independently and to support customers. This increases efficiency in service and spare parts.

- Portal training on functions and application
- Company Administrator, Employee Management
- Fleet Management
- Liebherr Data Exchange
- Spare parts catalogue and documentation
- Licence Manager
- Authorisation of third parties on machines

 Target group Customer service staff in the Indoor and field service	 Duration 0,5 day 08:00 am-12:00 am or 1:00pm - 5:00 pm
--	--

 Participant price free of charge, incl. catering during the training	 Number of participants minimum 6
--	--

Training location

LiebherrMixing Technologie GmbH
Im Elchgrund 12
D – 88427 Bad Schussenried
Training Centre

We also offer workshops at your Service Partner branch. Please contact us for further information.

Training expectations

Your opinion is important to us in order to continuously improve the quality of our training.

Please fill out the attached training expectation sheet and return it with your training registration.

We are always available to answer your questions. Thank you very much!
