Crawler Crane
LR 13000
Crawler Crane LR 13000

A new dimension

- Strongest crawler crane worldwide in conventional design
- Maximum capacity 3,000 t
- Maximum boom configuration 120 m + 126 m
- Boom system in four different versions erectable (from light to super heavy)
- Completely new developed and patented heavy duty boom
- Optimized transportation, width 4 m, single weight max. 70 t
- Concrete ballast units as 20“-container with twist lock easily and economically transportable
- Increased superstructure ballast for operation without derrick ballast

### Technische Daten LR 13000

Flexible operations

With derrick ballast and 400 t superstructure ballast

Without derrick ballast, with 750 t superstructure ballast
**Stepless adjustable derrick boom**

- 21-30 m

**Boom head**

1. Standard sheave set up to 2,150 t
2. Heavy load traverse up to 3,000 t

**Comfortable ballasting with spreader**

Economical transportation:
The 25 t ballast plates have exactly the measurements of a 20"-container.

**Modular hook block**

- Number of sheaves total: $30 = 2 \times (3 \times 5)$
- Capacity hook: $2 \times 2,120$ t
- Capacity at the LR 13000: 3,000 t
- Weight: 111 t
Redundant drives and control

Roomy crane cab

- New LICCON2 crane control
- 3. monitor with crane work planner
- Monitors for camera monitoring of the winches and crane rear

Powerpack

Two complete drive assemblies, Liebherr V8 diesel engines with 500 kW/680 HP each

Winches with single drives

for a maximum of fail proof operation and service friendliness. In case of failure a drive can be changed under load.

Main hoist winches:
Rope diameter: 52 mm
Rope pull: 62 t
Rope length: 2050 m

The Liebherr factory in Ehingen
The most modern mobile and crawler crane factory worldwide

Liebherr is the leading manufacturer of mobile and crawler cranes. The range of All-Terrain Mobile Cranes reaches from the 2-axle 35 t crane up to the heavy duty crane with 1,200 t capacity and an 9-axle carrier. The Lattice boom cranes on mobile or crawler chassis reach capacities up to 3,000 t. With universal boom systems and extensive additional equipment they are in operation on building sites all over the world.

The Liebherr-Werk Ehingen GmbH was founded in the year 1969. To stabilize and expand its international position as the leading supplier of mobile and crawler cranes in recent years an extensive factory expansion was realized. Today the Liebherr-Werk Ehingen possesses a total area of 840,000 m² of which more than 200,000 m² are fabrication areas under roof. A comprehensive worldwide service guarantees a high availability of the mobile and crawler cranes.
