Rock drilling tools
Atlas Copco Secoroc cluster drills

Concept and characteristics

Features
- The 10″ Dia. bits give better ground coverage in the hole for more efficient rock cutting.
- The bit head ratio to the 8″ class piston weight is a powerful combination.
- The heavy can improves lifetime and maintains value.
- Flexible to use by simply attaching it to the Kellybar.
- Diameter range 760 mm to 2500 mm.

Application
- Strength of rock >100 MPa
- Foundation drillings
- Rock sockets
- Secant pile walls
- Marine foundations
- More performance compared to conventional (core drilling)
- Less wear and tear
