A detailed 3D rendering of a yellow Liebherr LR 1160.1 crawler crane. The crane features a lattice boom extending upwards and to the right, supported by a grey jib. A black hook assembly hangs from the end of the boom, labeled '100t 220400lbs'. The crane is mounted on a large, multi-link crawler track system. The cab area is white with a dark roll cage and windows. The side of the cab is yellow with 'LIEBHERR' and 'LR 1160.1' printed on it. The background is plain white.

Remarks

- The load capacities stated are valid for lifting operation only (corresponding with crane classification according to ISO 4301-1, crane group A1).
- Machine standing on firm, horizontal ground.
- The weight of the lifting device (pulley block, hoist ropes, shackle etc.) must be deducted from the load capacity.
- Additional equipment on boom (e.g. walkways) must be deducted from the lifting capacity.
- The max. admissible wind speed can be preselected in the LML software and referred to in the load chart.
- Working radii are measured from centre of swing and under load.
- The load capacities are valid for 360 degrees of swing.
- Calculation of stability under load is based on ISO 4305 Table 1+2+3, tipping angle 4°.
- The structures are calculated according to EN 13001-1; EN 13001-2.
- The last digits of the given dimensions are rounded to 0 and 5 and may differ from the actual dimensions.
- Weights may vary depending on the delivered configuration of the machine filling level of the tanks as well as generally valid tolerances.
- The figures in this brochure may include options which are not within the standard scope of supply of the machine.

Concept and characteristics

High performance

A powerful, efficient and reliable electro-hydraulic drive system combined with a high-performance lithium-ion battery ensures high productivity and allows for several movements to be carried out simultaneously.

Ground pressure

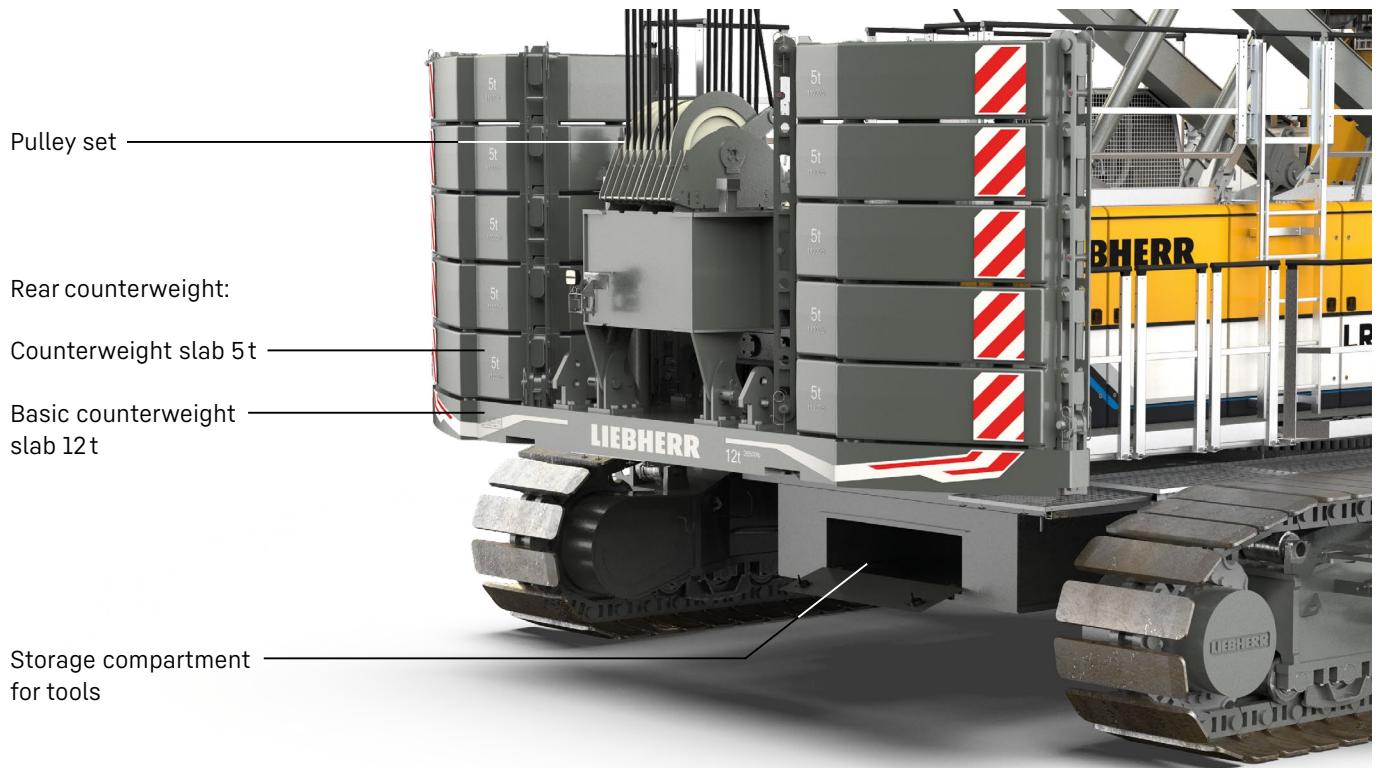

The actual ground pressure is calculated according to the configuration and position of the machine and displayed in the operator's cabin. Using the optional Liebherr Crane-Planner the actual ground pressure can already be calculated and displayed in the planning stage.

Cabin with high comfort

Optimised field of vision combined with enhanced comfort: an orthopaedic operator's seat with heating and cooling functions, as well as precise and ergonomic controls are included.

Control system

Easy and intuitive handling of control, service and machine functions through a large, clear colour monitor. Built for extreme environmental conditions.

Efficient self-assembly system and short assembly times

The self-assembly system enables safe, independent and quick assembly/disassembly of the crawler side frames, the carbody and rear counterweights, as well as boom elements.

Mobility

Crane parts are optimized for transportation. The maximum transport width is 3 m.

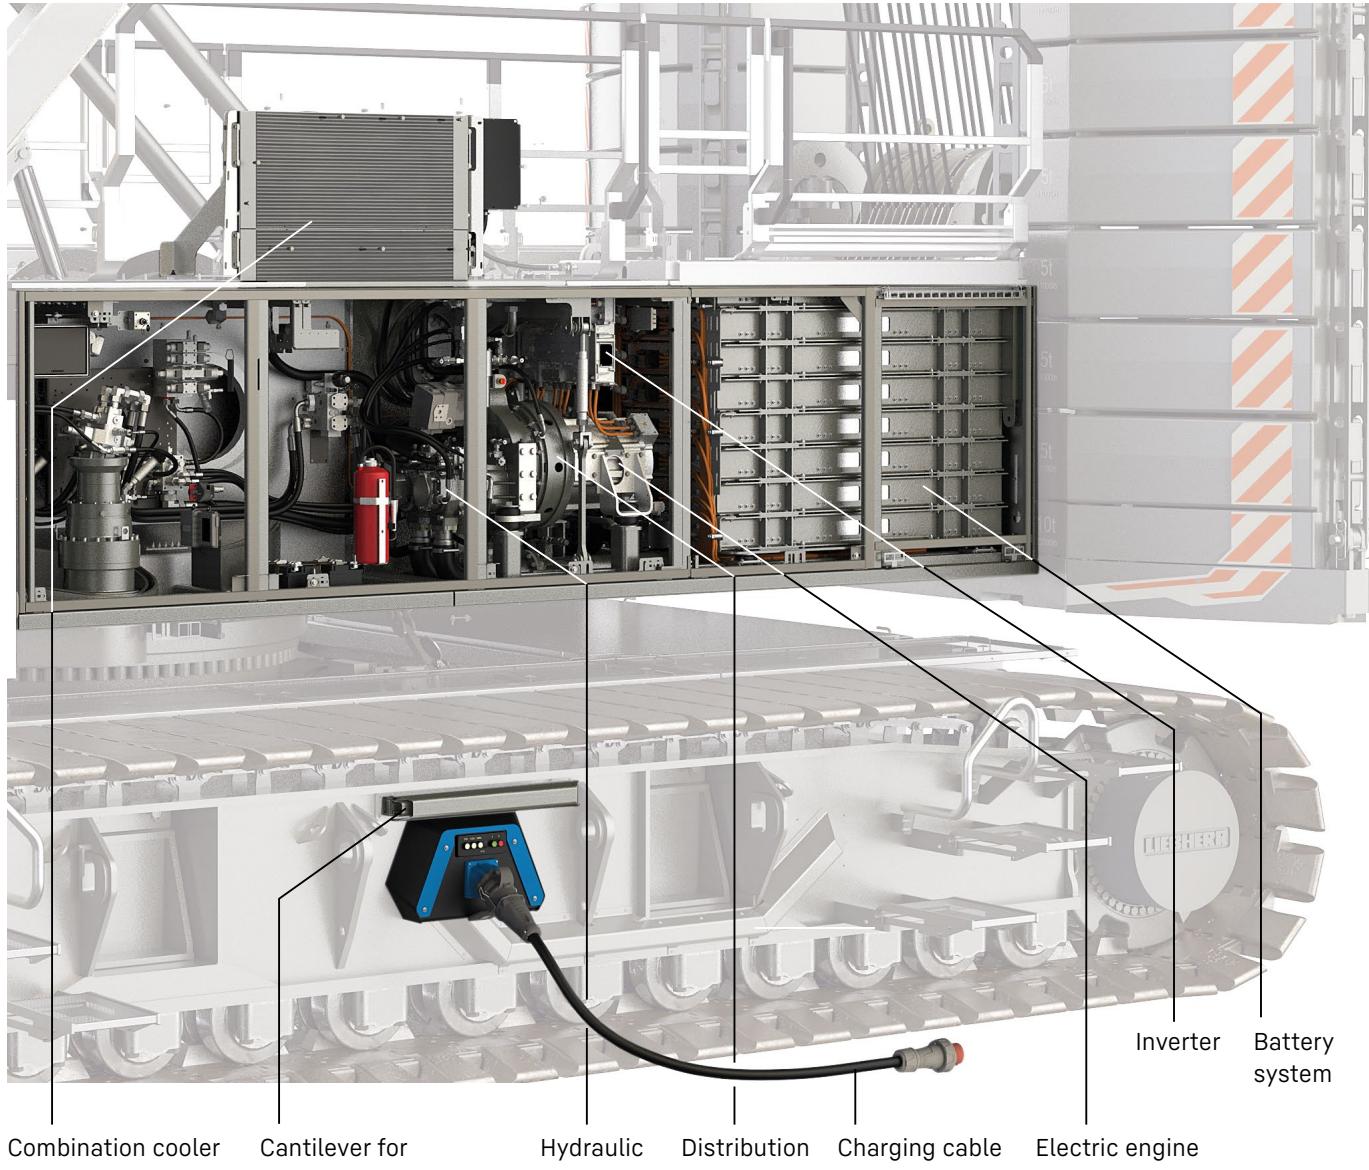

Easy service

The design ensures easy maintenance and service as well as safe access to the components.

Boom/jib

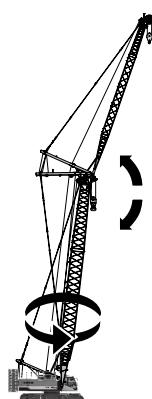

A variety of boom systems and configurations allow for optimum operation on the most diverse jobsites.

Exemplifying illustration

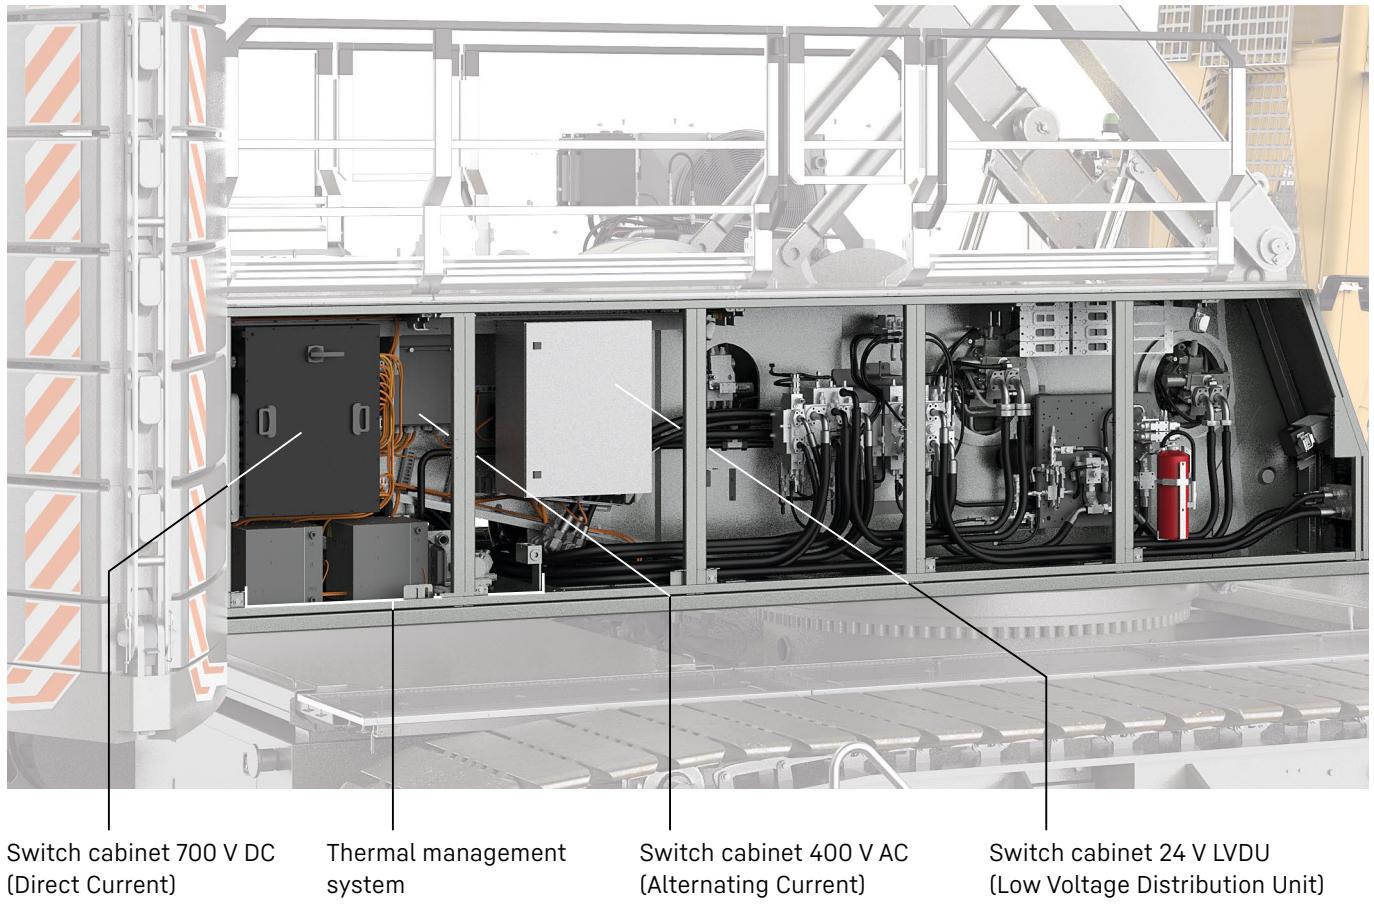

Performance “plugged in”

The crane’s performance in “plugged-in” operation is in no way inferior to its diesel-driven performance. The machine can be used without limitations as the battery charges continuously when connected and so delivers sufficient energy at all times.

Exemplifying illustration

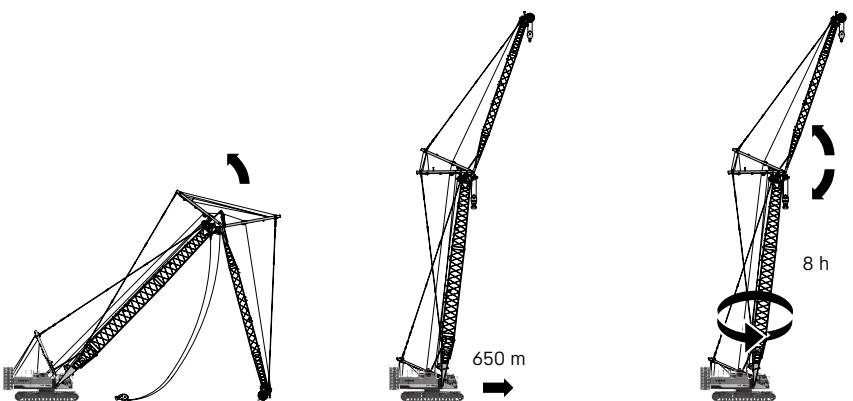

Performance “unplugged”

The crane's performance⁽¹⁾ in “unplugged” operation allows for erecting the boom and jib, for travelling a distance of approx. 650 m⁽²⁾ with full counterweight or for approx. 8 hours⁽³⁾ of crane operation.

¹ Battery service life can be optimized by operating the crane in “plugged-in” operation as often as possible.

² Fully ballasted on even terrain at 10-25 °C ambient temperature

³ With an observation period of 10000 shifts, in 50 % of all shifts the crane can operate in “unplugged” mode for approx. 8 hours at an ambient temperature of 10-25 °C.
