Quarrying industry

Earthmoving machines
Liebherr earthmoving machines for the quarrying industry

Liebherr has decades of experience in the development and production of class-leading machines for the quarrying industry, including crawler and mining excavators, wheel loaders, crawler dozers, dump trucks and duty cycle crawler cranes. With innovative design and major components all produced by Liebherr, the machines can be deployed with great efficiency and performance in the most challenging and difficult environments in the quarrying world. Quarry machines from Liebherr perform all tasks perfectly, and every component has been purpose-designed. They feed breakers, sifting systems and trucks, and transport the surface mine material. Liebherr machines work with immense power, and advanced technology reduces down fuel consumption – the perfect machines for economical use in the quarrying industry.

- Large hydraulic excavators
- Wheel loaders
- Articulated dump truck
- Crawler dozers
- Duty cycle crawler cranes
- Customer service
Large hydraulic excavators
Performance

Liebherr’s large hydraulic excavators follow our principle of maximising machine performance by improving the efficiency of all of the individual parts. Each machine is designed for optimum serviceability and minimum downtimes. An ultra-modern engine management system maintains perfect performance, under the toughest of working conditions.

Economy

For Liebherr, protection of the environment is one of our guiding principles and the most important challenge for the present and future. Environmentally-configured power regulation of the hydraulic system and engine performance optimises the fuel efficiency of the machine to match the application. The automatic idling system reduces engine speed when the machine is stationary, and if less power is required, “eco mode” can be selected on the control panel to reduce the engine load, further improving the fuel efficiency and reducing CO₂ emissions.

Reliability

As an original equipment manufacturer, Liebherr has a leading and healthy reputation in the development and production of high quality major components. All large hydraulic excavators from Liebherr feature robust and reliable components that have been optimised for the unique conditions of mining and are designed and manufactured by Liebherr to ensure reliability, high performance and longevity. Liebherr excavator customers can expect lasting performance throughout the whole service life of the machine.

Comfort

Liebherr large hydraulic excavators provide the driver with ideal conditions for fatigue-free and effective working. All of the excavators feature large and spacious cabs that are comfortably equipped and comply with the latest ergonomic conventions. This maintains the driver’s concentration and safety over many hours. Cab windows with impact-resistant reinforced glass enable safe working and an optimal view over the working space and surrounding area. For easy access during maintenance work, Liebherr large hydraulic excavators feature safe and comfortable catwalks as well as an innovative layout of the components and service points on the uppercarriage.

Maintainability

The Liebherr excavators offer perfect safety for the operator and maintenance team. As it is serviced from just one side, the machine offers trouble-free access to the main service points for fast and safe maintenance in the field. The cab has been designed with further reinforcement for the safety of the driver.
Overview of large hydraulic excavators with backhoe attachment

**Stick and bucket cylinders**
- With increased diameter in combination with adapted kinematics
- Higher breakout and digging forces

**Stick with internal protection**
- For a longer service life
- Protection from bulky material in the bucket

**Standard HD bucket**
- For increased service life
- Other types available
**Standard reinforced glass window**
- At front and in roof

**Cab on hydraulic mountings**
- For optimal vibration insulation

**Standard automatic air conditioning**
- With 13 diffusers

**Standard counterweight**
- For greater stability and performance

**Chamfered track pads**
- For better manoeuvrability on difficult terrain
Overview of large hydraulic excavators with face shovel attachment

Built for mining
- Liebherr GET
- Liebherr customised wear package
- Automatic central greasing system for all lubrication points
- Ram guard for the lift cylinder *
- Protection for front swing gear *

Sturdy structure
- Heavy duty undercarriage
- Additional full length chain guide *
- Rock protection for track wheels *

* optionally available
Efficient work
- Electronic control
- Rear- and side-view cameras
- Semi-automatic swing brake
- Operator comfort kit *
- Various optional protective equipment *
- Standard automatic air conditioning
- Cab pressurisation

Liebherr vertical integration
- Diesel engine US EPA Tier 4 Final / EU Stage V
- Hydraulic pumps and motors
- Splitter box
- Hydraulic cylinders
- Swivel bearing
- Swing and travel drives

First class service
- Single side service access
- Wide catwalk and railings
- Hydraulically operated 45° access ladder *
- Quick-release coupling for filling from ground level *
- Quick fuel filling system *

Wheel loaders
Performance

The powerful Liebherr L 550 XPower® – L 586 XPower® wheel loaders excel with their high handling capacity in quarrying operations. XPower® offers the greatest level of efficiency and maximum output in all areas, regardless of whether the distances are long or short, or whether the ground is level or even has an incline. This increases productivity in all work cycles and improves profit for the customer.

Economy

The Liebherr-XPower driveline with Liebherr-Power-Efficiency (LPE) achieves a reduction in fuel consumption of up to 30%. In addition there is minimal tyre wear and hardly any brake wear. At maximum handling capacity and efficiency, this reduces operating costs significantly, further increasing profitability.

Reliability

Liebherr wheel loaders provide maximum performance even under the toughest and most challenging conditions in surface mines. The components of the Liebherr-XPower wheel loaders are extremely rugged and low-wear. XPower® ensures a long machine life and reliability in use.

Comfort

The modern ergonomic cab design provides the operator with maximum comfort enabling him to concentrate on accurate operation without fatigue, which once again means more safety and productivity. The Liebherr control lever, which is built into the operator’s seat as standard, allows precise and sensitive control of the machine. The generous glass surfaces and the design of the engine hood, which has been optimised for viewing, provide excellent all-round visibility. This ensures maximum safety for people, the machine and the load.

Maintainability

The most important points for daily maintenance can be seen at a glance in the access area of Liebherr-XPower wheel loaders. Quick and safe control saves time and money.
Wheel loaders L 550 XPower® – L 586 XPower® overview

Maximum operator comfort for greater productivity

- Automatic central lubrication system (L 550–L 580 * / L 586 as standard)
- Premium display (Touchscreen)
- Joystick steering or 2-in-1 steering *
- 3-way continuously adjustable steering column
- Operator’s cab without steering wheel/steering column – joystick steering only *
- Liebherr weighing system with "Truck Payload Assist" *
- Ride control

Ruggedness and quality for durable machines

- Tilt cylinder protection *
- Special buckets in HD or rock version *
- Lamp carrier in steel design *
- Guard for headlights *
- Fuel tank steel version
- Integral tyre pressure monitoring system *
- Special tyres for quarrying industry *
- Tyre protection chains *
- Crash protection, rear *
- Widening for fender and rear mudguard *

* optionally available
Productive and safe working
- Soundproof ROPS / FOPS cab
- Safety roof over cab*
- Additional working lights, rear*
- Adaptive working lighting*
- Skyview 360°*
- Liebherr key with remote control incl.
  - Coming Home / Leaving Home function*
- Active personnel detection at the rear*
- Safe, non-slip ladder access to cabin
- Folding windscreen guard for increased safety and easy access for cleaning*
- Anti-slip steps and sturdy handrails
- Rear space monitoring with camera via Liebherr display
- Headlights halogen (double design on engine hood)

Short service times for greater productivity
- Important maintenance points visible in access area
- Radiator easy to maintain
- Reversible fan drive*
- Air pre-cleaner TOP AIR*

Highest level of performance
- Powerful and efficient Liebherr-XPower® driveline
- Automatic self-locking differentials in both axles

Articulated dump truck
Performance

Powerful and robust – The TA 230 was developed for tough offroad operations. The efficient yet powerful drivetrain, permanent 6x6 all-wheel drive, reliable traction control and solid axle suspension allow the Liebherr dump truck to dig its way through any terrain. Even in tough quarry applications, the dumper impresses with very good driving properties and always moves safely thanks to its phenomenal retarder performance.

Economy

Invest in a successful future with the Liebherr dump truck. It is the perfect combination of investment and yield. Short cycle times due to maximum efficiency in acceleration, transport and deceleration performance deliver enormous handling capacity and therefore maximum economy. Moreover, the modern Liebherr D956 construction machine engine marries power and efficiency for the sustainable protection of our environment.

Reliability

Liebherr has decades of experience in the development, design and production of components. When coordinated perfectly with each other, they guarantee maximum performance and reliability. The TA 230 has been developed and designed on the back of extensive test trials to ensure the resilience and quality of the component parts time after time. Even in the most adverse of conditions, the TA 230 still satisfies Liebherr’s high quality standards.

Comfort

The cab on the TA 230 with standard roll-over protection system (ROPS) provides the perfect environment for comfort, concentrated and productive work. Thanks to large all-round glass windows and the short, angled bonnet, the operator has perfect visibility of the machine’s driving, working and articulation areas. The ergonomic control elements and touchscreen display with integral rear-view camera simplify operation and extend visibility at the rear of the machine.

Maintainability

The TA 230 is not only powerful, robust, precise and efficient, but also features fast, simple and safe maintenance. This minimises the construction machine’s costs and down times.
Articulated dump truck overview

Simplified maintenance concept for maximum productivity

- Service-based machine design with easy access to the maintenance points
- Smart machine check-up
- Central lubrication system sensor-controlled**
- Storage compartment for toolbox and grease cartridges
- Qualified, experienced specialists for competent advice
- 24/7 spare parts service with 24 hour deliveries

Superior technology for highest economy

- 6-cylinder Liebherr construction machinery engine with emissions Stage V, Tier 4 Final, Stage IIIA (compliant) and non-regulated
- LiDAT – Liebherr’s information system for efficient fleet management and evaluation

Perfect combination for highest possible performance

- Permanent 6x6 all-wheel drive
- Automatic 8-speed powershift transmission
- Continuous-operation brake (engine brake, hydrodynamic primary retarder), zero wear
- Power shifting inter-axle and lateral differential locks for permanent traction
- Innovative weighing system to show the current payload
- Loading traffic light system *
- Large, solidly designed dump box
- Dump box flap *
- Dump box cladding and heating *
Ergonomic operator’s work station for maximum comfort

- Cab with large glass areas for improved visibility
- Rear window heating
- Electrically adjusted and heated rear mirror *
- Sound-insulated cab
- Sealed pressurised ventilation
- 9" large colour touchscreen
- Rear monitor
- Convenient radio control with hands-free kit
- Mobile phone holder and USB charging sockets
- Additional DIN installation frame
- Automatic air-conditioning system
- High quality operator’s seats in a range of versions
- Air-conditioned compartment
- LED dipped headlights with integral high-beam light
- Extra powerful LED headlights to illuminate the working area
- Manoeuvring lights for reversing
- Access ladder lighting *

Excellent machine concept for maximum reliability

- Painstakingly developed structural components
- Robust construction made of high-tensile steel
- Partly autonomous long-term load tests at the only testing centre of its kind in Europe
- ROPS / FOPS cab structure
- Tinted safety glass
- Hill start assistant
- Speed maintenance assistant
- Activation and deactivation of limit position dampening on the dump box cylinders
- Height limitation

* optionally available
** country-dependent

Performance

To mechanically dig and break out hard rock, high penetration and pushing forces are required. The Liebherr crawler dozers PR 756, PR 766 and PR 776 offer the ideal performance capacities with operating weights of 40, 50 and 70 tonnes respectively in conjunction with the innovative hydrostatic drive concept. Engine power is constantly transmitted through a positive connection without slippage, which means that the material is worked loose evenly and efficiently pushed away.

Economy

The latest generation Liebherr diesel engines combine high performance with frugal operation. Thanks to the consistently low engine speed, fuel is saved and a high service life of the components is achieved. Additional clear economical advantages speak in favour of Liebherr: as with all Liebherr equipment, the PR 756, PR 766 and PR 776 models also benefit from being user-friendly. This reduces maintenance costs and downtime.

Reliability

Tough and sturdy: Liebherr crawler dozers are designed for a long operational lifetime with careful attention to construction and material quality. All parts that are subject to particularly heavy loads are made from the strongest materials available, whilst sensitive areas are optimally protected. All of these factors make Liebherr crawler dozers reliable machines with the highest level of availability.

Comfort

Liebherr crawler dozers offer operators a generously proportioned workspace, designed with the latest ergonomic aspects in mind. The spacious and comfortable cabin enables an optimal overview of the working area and the equipment. With the intuitive single joystick control, the machine can be controlled accurately and safely at all times.

Maintainability

Thanks to their minimal maintenance requirements, Liebherr crawler dozers make a reliable contribution to your economic success. A dense service network means short distances, efficient systems and fast response times for the user.
Overview of crawler dozers

**LED-lighting** *
- Guarantees best illumination of the working area
- Better working performance even in the dark / bad light conditions

**Hydrostatically driven cooling fan**
- Fast engine warm-up and reliable cooling in each situation
- Laminar air flow facilitates a long radiator-life

**Different types of blades with HD-cutting edge**
- High flexibility for all kind of material
- High productivity

**HD-track pads**
- Highly wear-resistant in hard applications
- Longer uptime

* optionally available
Cab with integrated ROPS / FOPS protection
- Best all-around view for the operator
- Higher safety and productivity

Separate hydraulic oil cooler
- Reliable cooling performance even in the hottest ambient temperatures
- Reduced fuel consumption due to demand-controlled fan

HD-ripper
- Excellent ripping performance in hard underground conditions
- Robust design for longevity

Bogie suspension *
- Smoother operation
- Optimal traction

HD-tilt cylinder cover and wear-plates on push arm and blade *
- Best possible protection against large rocks
- Extended lifetime of components exposed to wear

Duty cycle crawler crane HS 8300.2
Performance
With an operating weight of 350 tonnes the HS 8300.2 from Liebherr is one of the largest duty cycle crawler cranes. It can be equipped with various high-volume dragline buckets and grabs. The duty cycle crawler crane is suitable for various material handling and excavation applications, for example, dredging or surface excavation in opencast mines.

Reliability
In the design phase of the HS 8300.2 Liebherr paid particular attention to an extended service life. The uppercarriage has a box design and is mounted on a large undercarriage. This composition ensures stability and is suitable for dynamic continuous performance. The service life of the HS 8300.2 has been doubled in comparison to that of the standard series. Liebherr places great emphasis on safety. The walkways as well as the roof of the uppercarriage are fitted with railings to ensure safe and easy access for the operator as well as for maintenance staff.

Economy
A modern drive system, consisting of a high performance diesel engine as well as an innovative hydraulic concept, ensures economic machine operation. As an option the duty cycle crawler crane can be fitted with Pactronic®, a hydraulic hybrid drive which provides both economical as well as ecological advantages. Through the storage and subsequent reactivation of surplus energy the turnover can be increased and, at the same time, the fuel consumption can be significantly reduced. Without Pactronic® the V12 diesel engine offers an output of 725 kW. Together with the hybrid drive, however, it achieves a system performance comparable to a conventional drive system with 1,250 kW. Quick set-up further contributes to the efficiency of the duty cycle crawler crane. A sophisticated design concept ensures that the machine is ready for operation within only one week.

Comfort
The cabin is designed for optimum operator comfort. This includes a clear field of vision as well as an ergonomic cabin concept. Furthermore, operators of the HS 8300.2 profit from an intelligent control system with diverse program and control functions. Service and machine functions are clearly displayed on colour monitors. All movements can be carried out simultaneously.

Maintainability
All components of the HS 8300.2 are designed for easy maintenance. Liebherr’s worldwide service network offers quick availability of parts and therefore maximum productivity of the machine.
Overview of HS 8300.2 duty cycle crawler crane

**Free-fall winches 2 x 50 t**
- Option: free-fall winches 2x70 t
- Enable the use of large grabs or dragline buckets and thus new dimensions in excavating depths

**Comfortable operator’s cabin**
- Spacious cabin with generously sized windows for an unobstructed view of the working area
- Folding seat for a second driver
- Air suspension driver’s seat, with heating, cooling and ventilation

**Hydraulically foldable steps** *
- Easy and safe access

* optionally available
**Drive concept**
- Choice of diesel or electro-hydraulic drive

**Pactronic®-hybrid drive** *
- Optimised drive concept
- High turnover with low diesel consumption
- System performance equivalent to 1,250 kW of a conventional drive system

**Service arm** *
- Facilitates quick and safe filling with necessary operating fluids

**Robust steel structure**
- Double service life compared to the standard HS series
- Optimum design for absorbing high dynamic forces

Customer service – the hidden benefits

Our services are perfect for the challenges you face every day

For experts

Would you like to maintain and care for your machines yourself? Quickly and flexibly get everything done in the evening for the next shift?

With the online documentation and spare parts shop in MyLiebherr, you can access all the necessary information with just a few clicks. Take advantage of the sophisticated logistics for fast delivery of the desired items, in original quality, of course. So you can work efficiently. And if you do get stuck, our experts are just a phone call away.

For accountants

Are figures and their significance your profession? Do you always want to have an overview of machine operations and current investments and, ideally, be able to calculate clearly in advance what the use of the machine will cost?

Always know what’s going on. LiDAT provides you with all relevant machine data, such as upcoming maintenance, machine workload and much more. With the modular CarePacks, you can optimise your maintenance package to your company and budget and accurately predict future costs.
For decision-makers and strategists

For you, it’s not just short-term success that counts, you want to be successful in the long term? Success for you is not only your profit, but also ensures satisfied customers and contributes to the successful conservation of resources?

Our world-wide service network guarantees you reliable support and security based on partnership. If necessary, our experts are available for you around the clock. With original parts and thanks to our professional staff, we enable a high value retention of your machines. Our Reman program as well as the lubricant product range offer you the possibility to be economically successful and to conserve resources at the same time.

CarePacks
With the modular CarePacks, you can decide in advance what costs you will incur, so that your machine can continue to perform at full capacity tomorrow and you can concentrate fully on your work.

Retrofit program
With its comprehensive Retrofit program, Liebherr offers an attractive range of products to increase the efficiency and comfort of your machines. Also for older machine types. Adaptations to new legal guidelines can be efficiently implemented.

A strong partner
Thanks to our extensive service network, our service experts are close at hand. It is important to us that you have a personal contact, because if the worst comes to the worst, it is good to know who can provide reliable help and advice.

Reman program
The same performance and quality as a new part, with cost savings at the same time – that’s what the replacement parts we offer in our Reman program stand for. An ideal solution, especially for older machines, and at the same time you contribute to the conservation of resources.
The Liebherr Group

Global and independent: more than 70 years of success
Liebherr was founded in 1949 when, with the development of the world’s first mobile tower crane, Hans Liebherr laid the foundations for a family business now employing nearly 51,000 people and comprising over 140 companies across every continent. The parent company is Liebherr-International AG in Bulle, Switzerland, whose associates are exclusively members of the Liebherr family.

Leaders and pioneers
Liebherr is a pioneer and its forward-looking approach has seen it make important contributions to technology history over a wide variety of industries. Employees throughout the world continue to share the courage of the founder, sharing a passion to produce innovative products and a determination to provide world-leading equipment and machinery.

Diversified portfolio
The company is one of the world’s biggest construction equipment manufacturers and provides high-quality, user-oriented products and services to sectors including: earthmoving, material handling, deep foundations, mining, mobile and crawler cranes, tower cranes, concrete production and distribution, maritime cranes, aerospace and transportation, gear technology and automation, refrigeration and freezing, components and hotels.

Customised care
Liebherr solutions are characterised by precision, implementation and longevity. The company is committed to technological excellence and to providing customers with solutions that match their needs exactly. That customer focus does not end with delivery of a product but continues through a comprehensive range of back-up and support services.
