System Overview – Litronic FMS II

The Litronic-FMS II with intelligent bus sensors is an independently operating moisture-measuring system, without the necessity of installing indication and operating units. It is thus ideally suited for controls featuring a visualisation system. The Interchange and evaluation unit can be installed compactly in a switch cabinet. A multitude of interfaces can be realised for the overriding systems. An easy-to-use PC-software allows a quick and precise calibration of the measuring channel.
