Transfer pipes

New Liebherr transfer pipes for maximum loading capacity and simplest assembly

We have improved the material quality of the most current rubber tubes for concrete discharge. You will benefit from this additional value in series, as well as in spare parts.

The new material quality from PU (polyurethane) is substantially more resistant to ultraviolet radiation and formwork oil.

Due to the low weight and the new clip the replacement is possible within the shortest time by one-man's assembly.

Extensive tests with different customers confirm the high quality of our new transfer pipes.

Do you have any requests or ideas? Let us know.
