

Rock drilling tools

LIEBHERR

Atlas Copco Secoroc cluster drills

Concept and characteristics

Features

- The 10" Dia. bits give better ground coverage in the hole for more efficient rock cutting.
- The bit head ratio to the 8" class piston weight is a powerful combination.
- The heavy can improves lifetime and maintains value.
- Flexible to use by simply attaching it to the Kellybar.
- Diameter range 760 mm to 2500 mm.

Application

- Strength of rock >100 MPa
- Foundation drillings
- Rock sockets
- Secant pile walls
- Marine foundations
- More performance compared to conventional (core drilling)
- Less wear and tear
