# 4C-Power

---

With the new **4C-Power** model we drive your performance and success to a new level. This model is available for the cutter wheel drives of the slurry wall cutter LSC 8-18 and delivers highest value with lowest investment costs.

## Connected

A strong partnership provides full service. Real-time condition monitoring foresees (4C) possible eventualities and allows us to react in good time. This leads to maximized uptime on your jobsite.

## Cared for

We take care of maintenance, availability and performance. We provide cutting power as a service so that you can focus on the important things.

## Clear

No unexpected costs. Workload and usage determine the price. Experience a whole new cost transparency by paying for the usage of the cutter wheel drives on an hourly basis.

## Competitive

Highest performance with maximized uptime. As partners we focus on the same goal: working equipment on your jobsite. Additionally, you profit from reduced investment costs.
