

# Testimonials from Liebherr-Australia Apprentices

Liebherr are committed to developing you to your full potential and will back this up with industry best training.

You will also be surrounded by some of the best people in the industry: what better way to learn, grow, and develop your career!

**Steve Hewitt**  
*Adult Apprentice*

“I was originally employed by Liebherr as workshop trade assistant and after a few months of thoroughly enjoying my work with a great team, I applied for an internally advertised position of Apprentice Plant Mechanic.

I am now into the second year of my apprenticeship and have not looked back, using the skills I have learned. The learning has given me the confidence to complete my jobs to a high standard.”

**“Liebherr have a good team environment: everyone is willing to lend a hand, spend time to teach you how things work and why they need to work in the way that they do”**

**Mitchell Dixon**  
*Employee and Apprentice*

“I knew Liebherr was going to be a good company to work for straight away from the way they conducted the apprenticeship testing. Every other company I had applied for had a completely different intake regime, that didn't really determine the individuals' potential but more their book smarts, that's what set Liebherr apart from the rest.

Working for Liebherr as an apprentice opens the door for so many learning experiences, providing both in-house and external learning opportunities.

**Emily Hickey**  
*4th Year Apprentice*

I felt at home the day that I started. Everyone was so inviting and two years later, they are still the same. We are a close knit family at Liebherr and that has to do with the company being a family owned and run company.

I recently spent some time at Liebherr Adelaide's Remanufacturing Facility which was a brilliant way to learn about various components and how they are made. It truly was an eye opening experience to see the time and effort required to manufacture these components that form part of a machine.”
