

Liebherr-Aerospace Receives Order for Airbus Helicopters' H160 Heating Valves

February 2018 – Liebherr-Aerospace Toulouse SAS, Toulouse (France) has been selected by Airbus Helicopters to supply the heating valves for its H160 helicopter program. Liebherr-Aerospace will not only develop, qualify and manufacture the environmental control system components, but the company will also service them.

Liebherr will supply two valves of the heating system that will be installed in the helicopter in order to provide hot air to the cabin, allowing to adjust the temperature inside the cabin and to demist the window panes of the helicopter.

Liebherr-Aerospace incorporated its latest innovations from the field of high-precision electro-mechanical controls into the design of the highly reliable heating valves. Made of light-weight aluminum, they contribute to the optimization of the helicopter's operating costs.

The contract for the heating valves is the second order Liebherr-Aerospace received in the H160 program: In September 2012, the company was selected to supply the main rotor actuator for the medium twin engine aircraft designed as the successor of the Dauphin helicopter.

Moreover, Liebherr supplies flight control, landing gear and air management systems or components for almost all of Airbus Helicopters' rotor wing families.

Liebherr-Aerospace is a leading supplier of systems for the aviation industry

Liebherr-Aerospace & Transportation SAS, Toulouse (France), is one of eleven divisional control companies within the Liebherr Group and coordinates all activities in the aerospace and transportation systems sectors.

Liebherr-Aerospace is a leading supplier of systems for the aviation industry and has more than five decades of experience in this field. The range of aviation equipment produced by Liebherr for the civil and military sectors includes flight control and actuation systems, landing gear and air management systems as well as gears and gearboxes. These systems are deployed in wide-bodied aircraft, single aisle and regional aircraft, business jets, combat aircraft, military transporters, military training aircraft, civil helicopters and combat helicopters.

Liebherr's aerospace and transportation systems division employs around 5,400 people. It has four aviation equipment production plants at Lindenberg (Germany), Toulouse (France), Guaratinguetá (Brazil) and Nizhny Novgorod (Russia). These production sites offer a worldwide service with additional customer service centers in Saline, Michigan (USA), Seattle, Washington (USA), Laval (Canada), Hamburg (Germany), Moscow (Russia), Dubai (UAE), Bangalore (India), Singapore and Shanghai (People's Republic of China).
