

Liebherr Delivers First HVAC Systems for Double-Deck Coaches to Bombardier

March 2013.

Liebherr-Transportation Systems has recently delivered the first heating, ventilation and air conditioning (HVAC) systems for TWINDEXX Vario double-deck trains to Bombardier. 135 coaches will be equipped with these systems. They are part of a framework agreement concluded in 2008 for a total of 800 double-deck coaches for German rail operator Deutsche Bahn (DB).

Liebherr-Transportation Systems supplies compact roof-mounted HVAC systems in two different versions for the passenger compartments as well as compact driver cabin HVACs, which will be integrated into the control panel alongside the control and switch elements. The systems were developed by Liebherr-Transportation Systems GmbH & Co KG in Korneuburg (Austria). They are manufactured at the company's production site in Radinovo (Bulgaria).

The new generation of double-deck coaches for Deutsche Bahn will thus also be equipped with Liebherr technology.

This order is an important milestone in the long success story that Liebherr has been writing for many years as a leading supplier of HVAC equipment for double-deck coaches.

Liebherr-Transportation Systems – Renowned Manufacturer of Railway Technology

Liebherr-Aerospace & Transportation SAS in Toulouse (France) is one of ten divisional control companies in the Liebherr Group and coordinates all activities in the fields of transportation and aviation equipment. It employs over 4,000 people worldwide.

Liebherr's transportation systems division deals with air conditioning, hydraulic actuation systems and electronic components for rail vehicles of all kinds, and is backed by many years of experience in the development and manufacture of these

technologies. In addition to its own sales and service centers, the division has access to the Group's development and service facilities around the world. This global set-up means that Liebherr-Transportation Systems is there for its customers wherever they may be.
