

Liebherr to introduce new equipment at the 2015 Intermat

- Several world premieres
- Product launches for the European market
- Exhibits include earthmoving and special deep foundation machines, material handling equipment, tower cranes, mobile cranes and concrete technology

Paris (France), 22 January 2015 – At the 2015 Intermat, Liebherr exhibits its latest construction equipment at the outdoor stand E6 / E035 of the Villepinte fairground in Paris-Nord, France. Liebherr not only launches numerous new products for the European market but also presents several world premieres.

The Liebherr Group presents at the 2015 Intermat trade fair in Paris, France from April 20 to 25, a cross-section of its latest construction machinery technology. The stand is located at outdoor section E6, No. E035 and, as in 2012, measures some 4,500 m² in size. The innovative highlights represent Liebherr's product ranges of earthmoving and special deep foundation machines, material handling equipment as well as tower cranes, mobile cranes and concrete technology.

Construction machines

One of Liebherr's world premieres at the 2015 Intermat is the R 946 crawler excavator with a new Liebherr diesel engine. It features an operating weight of approx. 40 tonnes and is the first crawler excavator from Liebherr to meet stage IV / Tier 4f emission standards.

Furthermore, Liebherr shows in Paris several pieces of equipment for the first time in Europe, after their launch at the Conexpo Con/Agg 2014 exhibition in Las Vegas (USA). This refers the truck-mounted concrete pump 37 Z4 XXT, which was updated in its design or to the LiSIM simulator for operator training on deep foundation and lifting equipment.

Cranes

Liebherr launches the LiUP crane driver elevator for tower cranes at the 2015 Intermat. The new development is perfectly coordinated to Liebherr tower systems and does not have to be removed during the erection and dismantling of the crane.

The 172 EC-B 8 Litronic Flat-Top Crane will be shown for the first time on an exhibition. The crane was introduced to market in autumn 2014. Compared to its predecessor, the 160 EC-B, this crane provides enhanced capacity and simplified crane erection features.

From its range of mobile cranes, Liebherr presents the 160-tonne LTM 1160-5.2 for the first time in Europe. It succeeds the LTM 1160-5.1 and was launched at the 2014 Conexpo Con/Agg in Las Vegas (USA).
