

### **Liebherr Inspects Air Conditioning Systems on Behalf of CFTA Rhônexpress**

**October 2016 – Liebherr-Transportation Systems was awarded a contract by French operator CFTA Rhônexpress to inspect the air conditioning systems in the Stadler Tango trams in Lyon and to develop a solution to ensure the performance and reliability of the air conditioning systems made by a third-party supplier - also in case of major outdoor temperature differences.**

If the test phase is completed successfully, the passenger areas and drivers' cabs throughout the fleet will be re-equipped accordingly by summer 2017.

“We are very proud of this project”, says Eléonor Borrallo-Gautier, Head of French Site, Liebherr-Transportation Systems GmbH & Co KG in Paris. “It shows that our customers value the quality of our services and place their trust in us. I am convinced that, with our expertise and technology, we will be able to make a major contribution to improving traveling comfort for the Rhônexpress passengers.”

### **Liebherr-Transportation Systems – Renowned Manufacturer of Railway Technology**

Liebherr-Aerospace & Transportation SAS in Toulouse (France) is one of eleven divisional control companies in the Liebherr Group and coordinates all activities in the fields of transportation and aviation equipment. It employs around 5,200 people worldwide.

Liebherr's transportation systems division deals with air conditioning, hydraulic actuation systems and electronic components for rail vehicles of all kinds, and is backed by many years of experience in the development and manufacture of these technologies. In addition to its own sales and service centers, the division has access to the Group's development and service facilities around the world. This global set-up means that Liebherr-Transportation Systems is there for its customers wherever they may be.
