

Rothmund boosts crane fleet with three mobile cranes from Liebherr

- LTM 1350-6.1 largest crane in the fleet
- Combination of part ballast and VarioBase® variable support base increases lifting capacity enormously
- Rothmund entering new territory with the telescopic crawler crane LTR 1100

Ehingen / Donau (Germany) September 2017 – Rothmund GmbH Kran und Montage has extended its crane fleet within the past few months with two Liebherr mobile cranes, an LTM 1030-2.1 and LTM 1350-6.1, as well as a Liebherr telescopic crawler crane LTR 1100. Rothmund set great store by the equipment of the two mobile cranes with the VarioBase® variable support system. These enable Liebherr cranes to deliver increased capacity, thereby making them even safer and more flexible to use.

Heiko Brückner, Managing Director of Rothmund, visited the Liebherr plant in Ehingen to receive his LTM 1350-6.1 in July. "All three cranes fully satisfy our need to extend our crane fleet", states Heiko Brückner, adding: "The 350-tonne crane offers tremendous lifting capacity with its Y telescopic boom guying. That makes it the best crane for our company and now also the largest in our fleet." The LTM 1030-2.1 ordered by Rothmund lives up to its role as a fast-erecting crane, as it is able to drive on the road with a part ballast of 2.3 tonnes. "The combination of part load and VarioBase® variable support system increases the crane's lifting capacity enormously", explains Heiko Brückner.

Rothmund is entering new territory with the newly procured Liebherr telescopic crawler crane LTR 1100. The Managing Director declares: "Although new to us, we intend to use this type of crane for concreting work or on long-term construction sites in future. The LTR 1100 is set to excel at driving with loads on the building site."

Rothmund GmbH Kran und Montage is celebrating its 35th anniversary as a company this year. The Pforzheim-based crane contractor currently employs 48 staff and has over 20 cranes, 10 forklifts with lifting capacity from two to 16 tonnes, low-loaders and

inloaders as well as loading cranes in its inventory. The company is also able to transport machines across Europe. As Heiko Brückner mentions: "The total package from Liebherr really suits us thanks to reliable customer service and rapid workflow planning. You're well looked after with this team in the background – to put it simply: a perfect partner."
