

Five Generation 8 crawler excavators for Meyer Erdbau GmbH & Co. KG

Colmar (France), 7 May 2019 – At Bauma 2019, Meyer Erdbau GmbH & Co. KG decided to purchase five Liebherr Generation 8 crawler excavators. The German company is located in the state of Brandenburg and is active in Berlin and Brandenburg. One R 926, one R 930 and three R 938 will be added to the company's fleet in the Berlin region.

The company Meyer Erdbau GmbH & Co. KG was convinced in particular by the expert advice it received from the sales and technical office of Liebherr. The machines are equipped with an undercarriage with 3 metre wide monoblock boom, as well as the LiKUFIX quick coupler system, and can be painted in any colour.
