

### **1250 tonnes of lifting capacity for Sweden – Jinert takes delivery of new LTM 1500-8.1 and LR 1750/2 from Liebherr**

- Jinert expands with LTM 1500-8.1 and LR 1750/2
- New cranes planned for work in industry, infrastructure and wind power
- Jinert operates 110 cranes from 18 branch offices in Sweden

**Ehingen / Donau (Germany), 10 May 2019 – Crane and heavy haulage contractor Sven Jinert AB took delivery of two new large cranes in mid-March at the manufacturing plant in Ehingen. The Swedish company is expanding its crane fleet with an LTM 1500-8.1 mobile crane and an LR 1750/2 crawler crane. In terms of lifting capacity, this is the largest crane delivery by Liebherr to Sweden in the company's history.**

Sven Jinert, who founded the company 1988 as a crane and work platform rental contractor, his son Björn Jinert, CEO and Anders Oxwal, CFO decided that they simply could not miss the opportunity to take delivery of the new cranes in person in Ehingen. The LTM 1750/2 is now the largest crane in the company's fleet. Björn Jinert explains: "The LR 1750/2 is a powerful, universal crane which we can use for a whole range of jobs, for example in industry, infrastructure projects, port handling and wind power. We ordered it with a complete set of equipment. The SX boom means that it can erect the largest wind turbines in Sweden. That was an important factor in reaching our decision."

The LTM 1500-8.1 is the second crane of this model in the Jinert fleet. Björn Jinert says: "We have had plenty of good experience with the Liebherr 500-tonne crane. It is the best crane in this class." Jinert has planned a wide range of applications for the LTM 1500-8.1, including maintenance and repair work on wind turbines.

Sven Jinert AB has 18 branches in Sweden. Anders Oxwal says: "We now have a 200-strong workforce and generate a turnover of € 40 million per annum." Company founder Sven Jinert continues: "We have had a very good working relationship with Liebherr for 30 years. We can always rely on the service provided by Liebherr partner Alfab. We now have 110 cranes including crawler cranes and mobile construction cranes. 90% of them are from Liebherr." Jinert also operates 40 telescopic loaders and

a wide range of heavy haulage vehicles including SPMTs. The company also provides complete solutions for heavy haulage and crane work.
