

Liebherr-Aerospace at Paris Air Show 2019

June 2019 – Liebherr-Aerospace will participate in the 53rd Paris Air Show from June 17th through the 23rd. The event takes place in Le Bourget (France), and the company is looking forward to display over 40 components for various aircraft programs, demonstrating its knowhow and innovative technology to partners, official delegations and visitors at this prominent aerospace event.

A leading supplier to the aviation industry, Liebherr-Aerospace welcomes all attendees to come visit its booth at Hall 2A, A276, and to learn more about its products. The booth's ample 2,800 square feet space, will not only accommodate visitors, but also serve as a venue to provide guests a unique opportunity to see and learn about Liebherr's finest and most innovative products on display. The company will have numerous components available for viewing, ranging from a skin heat exchanger and valves as parts of air management systems, to the A350 XWB nose landing gear, to flight controls and electronic units that are an integral part of new generation airplanes' blueprints.

"We are thrilled to continue our participation in this most vibrant event, with visitors and exhibitors from almost 100 countries. Paris Air Show remains the largest Aerospace event in the world, and Liebherr-Aerospace seizes the opportunity to meet face to face with industry leaders, experts, and enthusiasts. The venue is perfect to showcase our products and share our industry knowhow, as well as forge new relationships and nurture existing ones", said Nicolas Bonleux, Chief Commercial Officer of Liebherr-Aerospace & Transportation SAS.

A leading supplier of systems for the aviation industry

Liebherr-Aerospace & Transportation SAS, Toulouse (France), is one of eleven divisional control companies within the Liebherr Group and coordinates all activities in the aerospace and transportation systems sectors.

Liebherr-Aerospace is a leading supplier of systems for the aviation industry and has more than five decades of experience in this field. The range of aviation equipment produced by Liebherr for the civil and military sectors includes flight control and actuation

systems, gears and gearboxes, landing gear and air management systems as well as electronics. These systems are deployed in wide-bodied aircraft, single aisle and regional aircraft, business jets, combat aircraft, military transporters, military training aircraft, civil helicopters and combat helicopters.

Liebherr's aerospace and transportation systems division employs around 5,800 people. It has four aviation equipment production plants at Lindenberg (Germany), Toulouse (France), Guaratinguetá (Brazil) and Nizhny Novgorod (Russia). These production sites offer a worldwide service with additional customer service centers in Saline (Michigan/USA), Seattle (Washington/USA), Montreal (Canada), Hamburg (Germany), Moscow (Russia), Dubai (UAE), Bangalore (India), Singapore and Shanghai (People's Republic of China).
