

Press release

## **12 crawler excavators for HM-Entreprenør A/S**

- 50 years experience opt for high performance machines
- Best service in Denmark

**The Danish company HM-Entreprenør is based just 1.5 km from the headquarters of the JMM Group, Liebherr's Danish distributor. In 2017, HM-Entreprenør ordered 12 machines from Generation 6. Following the Bauma construction industry trade fair in 2019 in Munich, the company acquired 12 new Liebherr crawler excavators to replace Generation 6 excavators, and in early 2021 more excavators will be delivered.**

Horsens (Denmark), 7<sup>th</sup> January 2020 - HM-Entreprenør is convinced more than ever by the quality and performance of our machines. Company manager Leif Ejlertzen needs to replace machines and "this time it will be Liebherr". The company currently operates nine R 926s, three R 945s, to be joined by two new R 914 Compacts in early 2021. The machines are from the Generation 8 of crawler excavators, presented at Bauma 2019 in Munich. It was there that Leif Rudebeck Petersen of the JMM Group and Michael Mortensen of HM-Entreprenør closed the deal. The proximity of the two companies is very convenient for the delivery, but this was not the only criterion taken into account in the decision: service, quality and the competent people also played major roles. Johs. Møllers Machines A/S has over 75 years of experience and now covers all of the the Danish market.

### **Impressive performance of Generation 8 excavators**

Leif Ejlertzen, coordinator of the construction company, is impressed by the performance of the latest generation of excavators. He was pleasantly surprised by the Generation 6 excavators in 2017, but the improvements made mean the performance of the Generation 8 machines is "even more impressive". Liebherr excavators will be used in the Danish company's biggest project: the construction of a 240,000 m<sup>2</sup> logistics centre. Large quantities of earth must be shifted in this project, so the power of the Generation 8 excavators is a great asset for this site. Machine reliability is also important, because every machine stoppage represents huge cost to the business.

Generation 8 crawler excavators are equipped towards the future. Engine power is

---

increased, the counterweight is heavier and the bucket capacities are higher. The overall performance is therefore much greater.

### **“The best service”**

The Danish company works with the local dealer Johs. Møllers Machines. HM-Entreprenør has a full service contract for all of its machines. Leif Ejlerzen is familiar with the level of service of the competitors, and according to him “none of them compares to the JMM Group”. The Service is very important, the machines are all operating at the same time, so the company needs to be sure that no problems will slow down the project. In addition, maintenance is easier and safer on the new Generation 8 models. All service points are accessible from ground level. Engine oil, hydraulic oil, fuel and urea levels can be monitored the instrument panel display.

### **About HM-Entreprenør**

Management of this company, founded in 1971 by Henning Mathiassen, was taken over in 2008 by Michael Mortensen. The know-how and traditions have remained intact, only the fleet and the number of employees have continued to grow.

### **About Johs. Møllers Machines**

Johs. Møllers Machines A/S is part of the JMM A/S Group. The distributor has over 75 years of experience and today covers the entire Danish market. Johs. Møllers Machines covers sales and services of construction machinery, cranes and material handling.

### **About the Liebherr Group**

The Liebherr Group is a family-owned engineering company manufacturing a wide range of products. The company is one of the world's largest manufacturers of construction machinery and also offers high-quality, value-added products and services in many other areas. The Group now comprises more than 140 companies spread over all continents, it employs more than 48,000 people and in 2019 generated total consolidated sales of more than EUR 11.7 billion. Since it was founded in 1949 in Kirchdorf-an-der-Iller in southern Germany, Liebherr has pursued its goal: to win over its customers with exceptional solutions and to contribute to technological progress.
