

Press release

A mobile crane heads to Istanbul: New LTM 1120-4.1 for crane rental company Servet Coşkun Vinç

- The LTM 1120-4.1 is the most powerful 4-axle crane on the market
- The 120 tonne mobile crane will expand Servet Coşkun Vinç's fleet
- The customer appreciates Liebherr's product quality, long-term partnership and excellent service

Turkish crane rental company Servet Coşkun Vinç has taken delivery of a new Liebherr mobile crane, the LTM 1120-4.1. The new 120 tonner adds a 4-axle crane to the company's fleet alongside its existing cranes in the 100 and 200 tonne class. The LTM 1120-4.1's lifting capacity of nine tonnes on the 66 metre telescopic boom makes it ideal for erecting tower cranes and for industrial use.

Ehingen (Donau), (Germany), 8 August 2023 – Servet Coşkun Vinç has strengthened its crane fleet with a Liebherr LTM 1120-4.1. Sedat Coşkun, owner of Servet Coşkun Vinç, explains: "We spent a long time looking for a mobile crane with four axles and finally decided on the 120 tonne Liebherr unit since it is not only the most powerful crane in its class, but also has the longest boom. Apart from the high quality of their products, we have had very good experiences with Liebherr in Turkey for many years and are extremely satisfied with their level of service." The crane is equipped with proven technology and the VarioBase® support technology enables even higher lifting capacities, especially over the sliding beams. The "Hillstart-Aid" enables easy starting without rolling backwards on inclines.

The ECOdrive and ECOmode features offer further advantages during crane operation: ECOdrive makes the mobile crane significantly more comfortable and quieter by reducing the engine speed. Faster gearshifting delivers greater dynamic and traction offroad. On the road, the torque from the Liebherr diesel engine is used efficiently to minimise fuel consumption. ECOmode minimises both fuel consumption and noise emissions when operating the crane superstructure. The crane driver sets the required operating speed using the control lever and the LICCON crane control calculates the perfect engine rpm for the diesel engine.

Future use in industrial projects

In future, the new LTM 1120-4.1 will be used, among other things, for the assembly of tower cranes, in steel construction, in refineries and for indoor operations. "The enormous lifting capacity on the long boom, the strong rope pull and the small support base of the LTM 1120-4.1 are advantages here. In addition, the crane's compact dimensions are ideal for narrow working areas and, thanks to the good

turning radii, narrow roads are also no problem,” says Coşkun, visibly delighted with his company’s new acquisition.

Servet Coşkun Vinç has been operating as a rental company for industrial machinery for around 40 years and employs 55 people. As an all-round provider, Servet Coşkun Vinç primarily rents out its equipment for industrial projects. The Istanbul-based company’s extensive rental fleet includes cranes, work platforms and forklifts. The company’s crane portfolio includes a total of 25 cranes of various types. Of the five all-terrain cranes, three are from Liebherr. An LTM 1450-8.1 and an LTM 1230-5.1 will also join the fleet in early 2024.

About Liebherr-Werk Ehingen GmbH

Liebherr-Werk Ehingen GmbH is a leading manufacturer of mobile and crawler cranes. Its range of mobile cranes extends from 2-axle 35 tonne cranes to heavy duty cranes with a lifting capacity of 1200 tonnes and a 9-axle chassis. Its lattice boom cranes on mobile or crawler crane chassis deliver lifting capacities of up to 3000 tonnes. With universal boom systems and extensive additional equipment, they can be seen in action on construction sites throughout the world. The Ehingen site has a workforce of 4,300. An extensive, global service network guarantees the high availability of Liebherr mobile and crawler cranes. In 2022, the Liebherr plant in Ehingen recorded a turnover of 2.37 billion euros.

About the Liebherr Group

The Liebherr Group is a family-run technology company with a widely diversified product range. The company is one of the largest manufacturers of construction machines in the world. However, it also supplies high quality, user-focused products and services in many other sectors. The group currently comprises more than 140 companies based in every continent of the world. In 2022, it had a workforce of over 50,000 and recorded a consolidated total turnover of more than 12.5 billion euros. The company was founded in 1949 in Kirchdorf an der Iller in southern Germany. Since then, its aim has been to win customers by supplying high quality solutions and to contribute to technological progress.
