## **EcoVadis gold medal: Liebherr-MCCtec GmbH honoured again**

---

- **Liebherr-MCCtec GmbH, a division of the Liebherr Group, has retained its EcoVadis gold medal for sustainability**
- **The Liebherr division is amongst the top 1 % of companies rated in its sector**
- **Key metrics in the area of sustainability improved compared to the previous year**

**Liebherr-MCCtec GmbH has received the gold medal from the renowned sustainability rating agency EcoVadis for the third time in a row. This award recognises the company's continuous commitment to corporate responsibility.**

Nenzing (Austria), May 2024 - Liebherr-MCCtec GmbH has once again achieved the gold medal, which is reserved for the top 5 % of all companies assessed worldwide. With the new award, Liebherr-MCCtec GmbH, which coordinates all business activities of the Liebherr Group in the field of crawler cranes and duty cycle crawler cranes, as well as piling and drilling rigs from the construction machinery sector, has further strengthened its position by moving up from the top 2 % to the top 1 % of companies rated in its own industry.

Significant improvements and initiatives in sustainability were implemented in 2023. These include the introduction or expansion of ISO certifications in the areas of occupational safety and information security at Liebherr-MCCtec GmbH's four European sites and the definition of new quantitative targets in the Corporate Responsibility policy. New targets have been defined up to 2030, including certification to the highest standards for quality, occupational safety, energy, environment, and information security.

"Being awarded the EcoVadis gold medal once again is a confirmation of our efforts to further improve in terms of sustainability and social responsibility," says Tatjana Grisseemann-Peter, Manager Corporate Responsibility at Liebherr-MCCtec GmbH. "We are proud of our progress and remain committed to developing innovative solutions to make a positive contribution to our society and the environment."

As part of its commitment to the UN Global Compact, Liebherr-MCCtec GmbH has published an extended report in 2023 containing detailed information on governance, human rights, labour standards, environmental protection and anti-corruption. Another milestone is the development of a greenhouse gas management and decarbonisation strategy by 2030, which is based on the identification of various CO2 reduction measures and the setting of corresponding targets. In the production plants, this includes converting the heating systems, electrifying the vehicle fleet, and using alternative fuels such as HVO for

testing the cranes produced. For example, 95 % of the electricity used at all four production plants is already generated from renewable energies.

## About the Liebherr-MCCtec GmbH

Liebherr-MCCtec GmbH, headquartered in Nenzing (Austria), is one of eleven divisional parent companies of the Liebherr Group. It coordinates all business activities in the field of crawler cranes and duty cycle crawler cranes, as well as piling and drilling rigs from the construction machinery sector. In addition, a wide range of maritime cranes is manufactured in Rostock, Killarney and Sunderland.

Liebherr-MCCtec GmbH employs more than 5,500 people worldwide and has four European production sites in Nenzing (Austria), Rostock (Germany), Killarney (Ireland) and Sunderland (Great Britain). In addition, the company operates 49 sales and service companies around the globe.

## About the Liebherr Group – 75 years of moving forward

The Liebherr Group is a family-run technology company with a highly diversified product programme. The company is one of the largest construction equipment manufacturers in the world. It also provides high-quality, user-oriented products and services in a wide range of other areas. The Liebherr Group includes over 150 companies across all continents. In 2023, it employed more than 50,000 staff and achieved combined revenues of over 14 billion euros. Liebherr was founded by Hans Liebherr in 1949 in the southern German town of Kirchdorf an der Iller. Since then, the employees have been pursuing the goal of achieving continuous technological innovation, and bringing industry-leading solutions to its customers. Under the slogan '75 years of moving forward', the Group celebrates its 75th anniversary in 2024.

### liebherr-ecovadis-gold-2024.png

Liebherr-MCCtec GmbH receives the EcoVadis Gold Medal for sustainable action for the third time in a row. This puts the company among the top 5 % of all companies assessed worldwide and among the top 1 % of companies in its own sector.

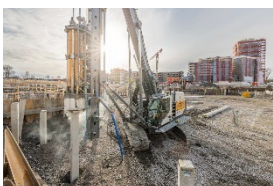

### liebherr-lps420e-rostock.jpg

The all-electric LPS 420 E represents Liebherr-MCCtec GmbH's fusion of power and environmental care. It is a universal all-rounder and a key asset for handling every type of cargo, from containers to bulk, general cargo and heavy lifts up to 124 tonnes. All crane movements like luffing, hoisting, slewing and travelling are done by electric motors.

### liebherr-sts-southampton.jpg

Liebherr container cranes use the latest in energy efficient drives, and can benefit from power regeneration, automation and hybrid technologies to further reduce energy consumption.

### liebherr-lrh100-unplugged.jpg

"Zero emission" is one exceptional feature of Liebherr's unplugged series.
