Our Story
More than 65 years of user-oriented design

Our story began in 1949, when Hans Liebherr was managing his parents’ building firm. He recognized the need for tools and machinery to aid in the reconstruction of Germany after the Second World War, so he worked with design engineers and tradesmen to develop the first mobile, easy-to-assemble tower crane. This product, along with innovations such as Europe’s first hydraulic excavator, provided the foundation for the Liebherr Group to become the global leader it is today — still driven by the same ingenuity and craftsmanship on which the company was founded.

Liebherr Today
Liebherr is now one of the largest manufacturers of construction machinery in the world. That global presence extends locally as well. Customers across North America depend on Liebherr products, thanks to our expanded product offering and growing service footprint.

We are also a renowned supplier of technically innovative user-centered products and services in numerous other fields — from aerospace systems to domestic appliances to first-class hotels. This diverse mix is backed by a culture of partnership that has helped us grow from the beginning.

A Family-Owned Company
For more than 65 years, Liebherr has been an independent, family-owned company that is synonymous with trustworthiness and stability. That history is built on a strong commitment to forming close long-term relationships with customers and colleagues. Partnerships built on mutual trust and collaboration are simply how we work.
Innovation From Within
At Liebherr, product development and innovation are an integral part of our company culture. That culture fosters leading-edge thinking to create unlimited possibilities for our customers. We continually invest in technology, manufacturing key components to the highest standards in our in-house facilities. The result is a unique portfolio of reliable products that prove themselves in the toughest conditions and on unconventional worksites around the world every day.

Our history and our values have prepared us to serve our North American customers with the same commitment and quality we bring to other locations around the world. We’re passionate about delivering solutions to solve your challenges and help you succeed.

The Liebherr Group currently employs approximately 44,000 people at over 130 companies, with a presence on every continent. Our holding company, Liebherr-International AG, is based in Bulle, Switzerland.
Working With Us
Customers are at the center of all we do

We value our employees and the people we do business with. We also have a passion for constant innovation, along with uncompromising quality standards. The needs of customers are at the forefront of everything we do, from development to service after the sale. These are the principles that guide our actions every day, for the long term. Our core values reflect what it’s like to work with Liebherr.

We are independent
"Our independence enables us to make decisions rapidly and autonomously."

As a family-owned company, we are able to take quick, decisive action. Our policy of extensive diversification also ensures stability. Because of this independence, we are able to make sound investments in our facilities, our processes and our distribution network that result in benefits to our customers. These investments have paid off in innovations and developments that have lowered the energy consumption of wheel loaders, excavators and material handling machines by as much as 30 percent.

We are a trustworthy partner
"We aim to maintain our consistency and trustworthiness for many years to come."

We strive for close cooperation with our customers and business associates, based on loyalty and fair play. Rather than being content with short-lived success, we aim for a long-term relationship. We supply products and services that create genuine added value and user benefit. Our policy is to be satisfied with our work only when the customer or business associate is satisfied. The proof is our steady growth since the company was founded. This is the result of creating and nurturing strong business relationships with industry-leading U.S. customers in the many markets we serve.

We are innovative
"We work systematically to keep one step ahead."

Electronic components in our construction equipment are designed and manufactured by Liebherr using the synergies of multiple divisions to produce the best end product. Liebherr control technology and electronics are embedded in most Liebherr products.
Our employees are a key factor in our success
“We greatly appreciate the degree to which our employees identify with their company.”

We are fortunate to rely on capable, highly motivated employees who remain loyal to us for many years and devote themselves enthusiastically to the Group’s interests. To promote this situation, we create suitable overall conditions: secure jobs and a healthy working environment where staff is encouraged to take on responsible tasks with ample freedom of action. We promote entrepreneurial initiative and offer our employees various basic and advanced training programs.

Liebherr stands for diversity in the cultural area as well. The Group draws strength from close teamwork across national borders. Cooperation within our Group is founded on integrity, mutual respect, fairness and trust.

We provide the highest quality in everything we do
“We devote all our efforts to best performance.”

Liebherr brings experience and expertise from the field in order to design products such as mining trucks. Maximum productivity and easy maintenance are a priority. All developments use state-of-the-art technology to improve each aspect of our machines, from 3D design tools to advanced welding techniques. This attention to detail allows us to simulate and analyze the best machine for an individual mine site.

We accept responsibility
“We aim at all times to fulfill our responsibility to society in general and to the environment.”

As a family-owned company active throughout the world, we carry considerable responsibility for society and the environment. We are convinced that we shall only achieve long-term success if we remain aware of this responsibility in all our activities. Protection of humanity and the environment is of special importance in our business activities. It means that our products and the processes used to manufacture them must be safe, efficient and environmentally acceptable. Integrity has high status for us as a family-owned company. We undertake to apply fair business methods when competing on world markets.
What We Do
Proven globally, committed locally

We are a leading global manufacturer of products and services for the construction and mining sectors, as well as refrigeration and freezing products for residential and commercial use. Our product range also includes aerospace and transportation systems, gear cutting technology and automation systems and high-performance components for mechanical, hydraulic and electrical drive and control technology.

Expansion into North America
Liebherr’s expansion in North America followed a similar pattern to its success in Europe and throughout the world. Our commitment to the United States market began in 1970 with the construction of two manufacturing facilities and our North American headquarters in Newport News, Virginia. Over the years, new companies were formed to fulfill customer needs in different industries.

Today, we are growing our brand presence in the United States by transitioning into a company with a simpler structure and broader reach to deliver an exceptional and consistent experience. We now operate five separate companies across the U.S., marketing and manufacturing a wide variety of products and technologies.

Liebherr Companies in the USA

Liebherr USA, Co.
The continuous growth of Liebherr in North America contributed to the formation of Liebherr USA, Co. The new organization was created in 2016 to streamline service for our customers and business partners. Headquartered in Newport News, Virginia, this umbrella company brings nine North American product units under one roof to offer a wider portfolio of products, positioning Liebherr for rapid expansion and growth.

Liebherr USA, Co. provides sales and service on behalf of nine different Liebherr product units: Construction Equipment; Mining; Mobile and Crawler Cranes; Tower Cranes; Concrete Technology; Foundation Equipment; Maritime Cranes; Components and the Appliances division, which includes refrigerators and freezers.

Liebherr USA Co. territories cover nearly 85 percent of the U.S. through the different Liebherr branches and distribution networks, and even extends outside the United States to Mexico, the Caribbean, and Central and South America through sales, parts and service from our Maritime and Concrete Technology divisions.

Liebherr Mining Equipment Newport News Co.
This plant has been manufacturing large diesel-electric mining trucks designed to handle payloads of up to 400 tons for the international mining industry since the mid-1990s. These trucks are specifically engineered for use in high-production sites in extreme climates, and they operate in a variety of worldwide mining applications. Customers can expect a high level of performance from these machines at the lowest cost per ton moved.

The design, engineering and partial assembly of the gigantic Liebherr trucks takes place at the Newport News plant, where they are tested and certified. Complete assembly is then carried out at the mine. Customers can rely on our extensive customer service network and genuine Liebherr parts to support their mining equipment. Liebherr’s reliable, committed and trustworthy service staff are located close to all major mining operations. We have a large number of continental, regional and local warehouses to support Liebherr equipment worldwide.
Liebherr Gear Technology, Inc. and Liebherr Automation Systems Co.
These two Liebherr companies were established in 1986 and belong to the Group’s Gear Cutting Technology Division. At the plant in Saline, Michigan, we produce gear cutting machines and turn-key automation systems for customers in the USA, Canada and Mexico. In addition to production operations, the sales, project management, servicing and spare parts supply for gear cutting machines and automation systems are located here.

Liebherr’s Gear Cutting line includes gear hobbing, shaping, skiving and grinding machines, as well as ChamferCut solutions. The line also features the LHGe@rTec control system, an intuitive interface that streamlines machine operation and efficiency. Also in Saline, Liebherr offers a REMAN program for our vast product range. This program returns equipment to original manufacturer quality through reconditioning, overhaul or repair.

Liebherr Aerospace Saline, Inc.
This company began operation in 1989 and is Liebherr’s dedicated aftermarket aerospace service center for the Americas. Having accomplished its fourth building expansion, Liebherr Aerospace Saline provides component repair and overhaul, material sales, logistics, technical and engineering support, and customer service.

The organization maintains a broad spectrum of capabilities for air management, flight control and actuation systems, landing gear, and electronic equipment manufactured by Liebherr Aerospace. This equipment is operated on various civil aviation platforms including Airbus, Boeing, Bombardier and Embraer, as well as Airbus and Leonardo Helicopters. Liebherr-Aerospace Saline has shown sustained growth and benefits from a well-established reputation for superior delivery of products and services to its customers.
Our Local Commitment

Local Economic Impact
Liebherr’s growing presence in the United States has created jobs in communities across the country, making a direct and positive impact on the local economy. We operate 13 locations in the U.S., creating a wide range of jobs with roles in manufacturing as well as sales and service across all of our divisions. Our operations also impact local economies indirectly through the use of U.S. suppliers for everything from manufacturing to delivering and distributing our products.

Liebherr as an Employer
The continued success of the company lies in the teamwork, dedication and enthusiasm of our most valuable resource: approximately 44,000 employees worldwide, including over 1,000 in the U.S. Just as we are focused on leadership in product development and customer service, we are also committed to recruiting, developing, rewarding and retaining our employees.

To that end, we not only strive to create a secure, safe and productive work environment, but we also offer a broad range of professional development opportunities in different career fields. Staff members can be employed anywhere in the industry, specialize in a specific area and develop internationally. In fact, many Liebherr employees who have been trained and developed internally remain loyal to the Group for the long term and continue to contribute to the company’s ongoing success.

Product Support
Beyond high-quality products, we offer our customers tailored solutions to meet their individual needs. Whether you need spare parts, production licenses or telemetry systems, you can count on Liebherr for comprehensive service and competent advice. Our support offering includes a worldwide sales and service network, used and rental machines, staff training and logistics, and much more.

Parts Distribution
Our national parts distribution center in Newport News, Virginia, along with our distribution centers in California, Florida, Maryland, Michigan, Missouri, Nevada, New Jersey, North Carolina, Texas and Wyoming, are dedicated to expediting parts orders, improving operational efficiency and minimizing transit time. We also have a new global logistics hub in Germany to supply spare parts for the earthmoving business. These facilities ensure outstanding customer support throughout the U.S. and North America.
Product Portfolio
What we offer in the United States

Aerospace and Transportation Systems
Liebherr offers high-precision components and individual system solutions, all backed by many years of experience in aerospace and transportation systems. We work in close collaboration with aircraft and engine manufacturers to produce components for the aerospace industry, as well as developing and manufacturing products for rail cars.

Components
Liebherr is a specialist in the development and production of high-performance components for a wide range of industries, from aerospace to wind energy. Our components offer robust design and outstanding quality for areas including mechanical, hydraulic and electrical drive system and control technology.
Liebherr provides a diverse range of concrete technology solutions, including the development and manufacturing of high-quality concrete mixing batching plants (stationary units or high mobile solutions for on-site production) and concrete pumps manufactured in Germany and assembled in the USA on local chassis. We also offer environmentally friendly solutions for the recycling of fresh concrete. Concrete placement can also be done with our conveyor belts for truck mixers. Together these products are designed for cost-effective mixing and transportation of all kinds and types of concrete, from normal concrete to high-strength concrete, to self-leveling and compacting concretes. Additionally, all our machines integrate Litronic, Liebherr’s electronic control system for easy and efficient operation.

Concrete Technology

Products
- Concrete pumps
- Control systems
- Conveyor belts
- Mixing plants
- Mixing systems
- Moisture measuring technology
- Recycling plants

Markets and Industries Served
- Concrete pumping providers
- Mass concrete projects (hydro dams)
- Precast factories
- Ready-mix producers
- Site projects that need on-site mobile solutions

Crawler Cranes

Liebherr crawler cranes are ideal for performing a multitude of applications reliably and economically. Key features of our line include strong load charts across the entire working range, fast and efficient assembly and dismantling, low transport weights, and compact dimensions.

Products
- LR - Crawler cranes
- HS - Duty cycle crawler cranes
- LTR - Telescopic crawler cranes

Markets and Industries Served
- Industrial and civil engineering
- Infrastructure construction
- Renewable and non-renewable energy
- Specialized lifting
Liebherr offers an extensive line of earthmoving equipment, from excavators to wheel loaders to crawler tractors. Main components of these machines are developed and manufactured in-house by Liebherr or in close collaboration with our partners to ensure the highest possible quality standards. These components include the entire drive and control technology, diesel engines, and a variety of components for the hydraulics, gearboxes and electronic systems.

**Products**
- Attachment tools
- Crawler excavators
- Crawler loaders
- Crawler tractors
- Pipe layers
- Pontoon excavators
- Specialized equipment configurations
- Wheel loaders
- Wheeled excavators

**Markets and Industries Served**
- Aggregates
- Construction
- Demolition
- Forestry
- Landscaping
- Material handling
- Specialized lifting

Maritime Cranes
Liebherr Maritime Cranes specializes in cargo handling solutions for ports, as well as for the shipping and offshore industry. Products include ship-to-shore container cranes, mobile harbor cranes, offshore cranes, ship cranes, rubber tire and rail-mounted gantry cranes and reachstackers. Our professional maritime training simulators ensure that crane drivers achieve highest productivity levels. In addition to state-of-the-art cargo handling and training solutions, we offer a well-structured global service network for quick response times.

**Products**
- Port equipment
- Mobile harbor cranes
- Offshore cranes
- Ship cranes
- Floating transfer solutions
- Reachstacker

**Markets and Industries Served**
- Container handling
- Bulk and scrap handling
- General cargo and break bulk
- Heavy lift
- Stacking
- Oil and gas
- Deep sea foundation
- Wind industry

Earthmoving Equipment
Liebherr offers an extensive line of earthmoving equipment, from excavators to wheel loaders to crawler tractors. Main components of these machines are developed and manufactured in-house by Liebherr or in close collaboration with our partners to ensure the highest possible quality standards. These components include the entire drive and control technology, diesel engines, and a variety of components for the hydraulics, gearboxes and electronic systems.

**Products**
- Port equipment
- Mobile harbor cranes
- Offshore cranes
- Ship cranes
- Floating transfer solutions
- Reachstacker

**Markets and Industries Served**
- Container handling
- Bulk and scrap handling
- General cargo and break bulk
- Heavy lift
- Stacking
- Oil and gas
- Deep sea foundation
- Wind industry
Foundation Equipment
From drilling, pile driving and slurry wall installation to soil improvement, Liebherr’s deep foundation machines make optimum foundations possible for demanding construction projects. Our versatile products deliver powerful performance in extreme conditions, as well as long-term reliability and cost-effective operation. Attachments and tools are also available.

Products
• Drilling rigs
• Fixed and swinging leaders
• HS duty cycle crawler cranes
• Piling and drilling rigs

Markets and Industries Served
• Deep foundation
• Foundation
• Industrial construction
• Infrastructure construction (roads, railway, airport, seaport)
• Special foundations for high-rise buildings

Gear Cutting Technology and Automation Systems
Liebherr is one of the leading specialists for automation systems in the world. From the automotive industry to wind turbine manufacturers, customers around the world trust in our machines. The broad range of products from our automation systems ranges from linear robots to pallet handling systems. This makes it possible to realize projects in all areas of production and assembly.

Liebherr offers energy-efficient solutions for a wide range of gear manufacturing applications. These machines can be adapted to each customer’s requirements by our highly qualified staff. Select products also feature our new LHGe@r-Tec control interface for even more intuitive and comfortable operation. No matter which Liebherr solution is chosen, we guarantee above-average availability of the systems to our customers.

Products
• Conveying systems
• Deburring solutions
• Gantry robots
• Gear generating and profile grinding machines
• Gear hobbing machines
• Gear shaping machines

Markets and Industries Served
• Aerospace
• Agriculture
• Automotive
• Earthmoving
• Mining
• Oil/Gas
• Wind turbine manufacturers
Material Handling

Liebherr offers a wide variety of machines and technologies that are custom-engineered for material handling applications. Our highly specialized solutions are designed to deliver faster cycles, greater handling capacities, outstanding maneuverability and efficient operation.

Products
- Attachment tools
- Crawler loaders
- Crawler material handling machines
- Crawler tractors
- Duty cyclic crawler cranes
- Electric material handling machines
- Mobile material handling machines
- Wheel loaders

Markets and Industries Served
- Bulk materials handling and transfer
- Coal storage
- Grain storage
- Metal and non-metal scrap recycling
- Timber
- Waste management

Refrigerators and Freezers

Liebherr appliances have been synonymous with quality, design and innovation in refrigeration and freezing products for more than 60 years. Our appliances are used in both residential and commercial applications, providing the best refrigeration solutions for your business or home. Innovative technologies, high-quality materials and energy efficiency are the hallmarks of our brand. Our advanced food preservation technology, BioFresh, ensures the preservation of foods’ important vitamins and minerals, and helps food taste fresher for far longer.

Products
- Refrigerators
- Freezers
- Undercounter appliances
- Beverage centers
- Wine cabinets
- Humidors

Markets and Industries Served
- Beverage
- Branded and display products
- Food service
- Frozen food and ice cream
- Pharmaceutical
- Research and laboratory
- Residential appliances
- Restaurant and hospitality
Mining Equipment
Mining is a challenging industry. By partnering with Liebherr-Mining, you have the benefit of our 50 years of experience in design, manufacturing and support of mining machinery. We work closely with our customers to provide options that add value and can be adapted to your specific requirements. Quality, reliability and innovative technologies ensure that mining operations are not only safe but also time and cost-efficient at all times, even under the toughest of conditions.

Products
- Crawler tractors
- Mining excavators
- Mining trucks

Markets and Industries Served
- Open-pit mining

Mobile Cranes
There’s a Liebherr mobile crane to match virtually any requirement. Our cranes are powerful, compact and maneuverable, and feature ultramodern technology that satisfies combined on and off-road operating requirements on construction sites of all kinds.

Products
- LTM – All terrain cranes
- LRT - Rough terrain cranes
- LTC - Compact cranes
- LG – Lattice boom cranes

Markets and Industries Served
- Industrial and civil engineering
- Infrastructure construction
- Renewable and non-renewable energy
- Specialized lifting
This product division within the Liebherr group of companies is the leading global manufacturer of mobile construction and tower cranes. Our wide range of products include an extensive program of high quality tower cranes featuring all systems and size ranges. They include fast-erecting, top-slewing, luffing jib and special cranes.

**Products**
- Fast-erecting cranes
- Mobile construction cranes
- Flat-top cranes
- Hammerhead tower cranes
- Luffing tower cranes
- Derrick cranes
- Planning and engineering

**Markets and Industries Served**
- Bridge construction
- Chemical plants
- Civil engineering
- High-rise construction
- Mining
- Power plants
- Renewable energy plants
- Shipyards
